The DVD to 3GP Suite is a discount software pack which is designed to convert movie DVDs or other videos to 3GP, AVI and more video/audio/image formats for your mobile phone at a lower price. Two powerful applications: DVD to 3GP Converter and 3GP Video Converter are included in this suite. The DVD to 3GP Suite supports nearly all most popular 3GP mobile phones such as iPhone, BlackBerry, Nokia, Motorola, Samsung, LG, etc..

Key Features

- Split a large video file to smaller video clips to fit your device memory.
- Support batch conversion at the same time which could free your hands and save your time.
- Remove DVD copy protection on-the-fly: Region-free & CSS-free, remove Sony ARccOS copy-protection, copyright-protection.
- Multiple Converting Modes: The whole DVD movie content could be converted under three modes (Entire Disc, Main Movie, and Customize). You have freedom to select which mode is the best match with your BlackBerry.
- The built-in converting engine will automatically extract sound tracks from DVD movie for BlackBerry.
- Multiple languages supported let you use it more conveniently.
- Flexible locations to choose, you can save the converted files either on your stylish BlackBerry or on hard drive.
- Automatically detect your BlackBerry as soon as it is connected to PC to save time on finding out your device.
- Playback source files directly, in this way you can have a general idea of what files you are going to convert.
- Preview source files in mini window. You can freely select the better one to convert.
- Real-time display the whole conversion process with detailed information of file size, file name, estimated time and elapsed time.
- Quickly open destination folder that help you to find out the converted files as soon as it converted.
- All generations of BlackBerry could be supported. We are keep updating with the latest version to support your needs.
- User-friendly interface makes you finish converting with a few easy steps.
- Lifetime free upgrade
- Lifetime free technical support
