-------------------	---

4Media DVD Creator has great ability to create DVD movie from various video files including AVI, MPEG, WMV, MP4, MTS, M2TS, MKV and so on, and burn these video files to DVD folder or ISO image file. This DVD creator software allows you burn DVDs with personalized DVD menu and is highly compatible with most disc formats.

Have you imagined creating your own DVD movie with all your video stories? 4Media DVD Creator empowers you to preserve and burn video files to DVD movie disc (e.g. convert AVI, MPEG, WMV, MTS, M2TS, MKV, MP4 to DVD), and also create DVD folder or ISO file from video files. Compatible with DVD-R, DVD+R, DVD-RW, DVD+RW, DVD+R DL and DVD-R DL, 4Media DVD Creator supports burning video files to different DVD disc formats.

A great variety of DVD authoring features are included in this DVD creator software, allowing you to create a specific DVD menu, clip video to reserve the essential clips, crop video frame size, adjust video effect, add watermark, and set audio tracks and subtitles for target DVD movie.

High burning speed and superior image/sound quality to burn DVD movie with 4Media DVD Creator! Have a free trial of this amazing DVD creator software to turn your videos into DVD and share your stories with friends.

Key Functions

- Create DVD from Video Files
- Convert Videos to DVD Folder or ISO File
- Create Custom DVD
- Multithreading and Multi-Core Processing
- Burn Videos to Various Disc Formats

Key Features

Clip Video

Scissor out required clips from source video and merge them into a new video for DVD burning in this DVD creator software.

Create and Edit DVD Menu

Choose a menu template to create DVD menu promptly, and customize DVD menu by adding menu topic, background music/picture and opening film.

Crop, Effect and Watermark

Crop video size to clip off redundant borders like a tailor; add special artistic effects to your video; add picture/text watermark to mark the video as your own.

Add and Edit Audio Tracks

To create DVD movie with multiple audio tracks, just add them to DVD movie and set the audio delay time if video and audio are not synchronous.

Add and Edit Subtitles

This DVD creator application can burn DVD movie with multi-language subtitles by adding subtitle files of different languages, and setting their style and delay time if necessary.

Extra DVD Editing Options

Set a video clip or a frame as the title miniature in menu; skip menu to play main movie directly but not display menu; add chapters automatically in each title by time length you set.

Adjustable Video/Audio Parameters

Also provide adjustable video/audio parameters to customize target DVD: bit rate, television standard, aspect ratio, frame rate, sample rate and so on.

Built-In Player for Preview and Snapshot

Preview video files and take a snapshot of video frames anytime during preview in the built-in player. The player window size is adjustable.

Easy to Handle

Creating DVD movies is reasonably easy to handle in the DVD burning software with concise interface and sound detail design.

More Useful Options

Choose burn target, write speed and burn copies; specify an after done action to save trouble; make the DVD creator software run in the background to lower the priority of this program; set the interval to check for updates.

System Requirements
