4Media DVD to iPhone Converter for Mac and 4Media iPhone Video Converter for Mac constitute this versatile Mac DVD to iPhone suite to make your iPhone a mobile cinema. To enlarge your iPhone video and movie library, the DVD to iPhone converter for Mac can rip/convert **DVD to iPhone video MP4/MPEG-4** and audio **M4A, MP3**, and the iPhone video converter for Mac can convert all popular video and audio files like **AVI, MPEG, WMV, MOV, VOB, AAC, AC3** to iPhone video and audio.

The Mac DVD to iPhone converter and Mac iPhone video converter allow you to convert certain segment, split a large file into small ones by given size or time, adjust output file size by setting bit rate, and adjust more parameters like video size, frame rate, etc. to get custom iPhone video.

Key Functions

Mac DVD to iPhone video converter - rip/convert DVD to iPhone video
Convert and rip DVD to iPhone MP4/MPEG-4 video files with different resolutions for enjoying movies on iPhone while travelling.

Mac DVD to iPhone audio converter - rip/convert DVD to iPhone audio
Extract background music and dialogue from DVD movie as iPhone MP3, M4A, WAV music files.

Mac iPhone video converter - convert video to iPhone video
Any video files like AVI, MPEG, WMV, MP4, MOV, M4V, VOB, ASF, 3GP, 3G2, QT, YUV, DAT can be played on iPhone once you convert them to iPhone MP4/MPEG-4.

Mac iPhone audio converter - convert video/audio to iPhone audio
Extract iPhone MP3, M4A, WAV audio from these video files, or convert MP3, WMA, AAC, WAV, M4A, AC3, MP2, AU audio format to iPhone music.

Key Features

Lots of input formats supported
DVD-Video, DVD folder, and popular video and audio formats including AVI, MPEG, WMV, MP4, MPEG-2, MPEG-4, MOV, M4V, VOB, ASF, 3GP, 3G2, QT, YUV, DAT, MP3, WMA, AAC, WAV, M4A, AC3, MP2 and AU can all be converted to iPhone files.

Optimized profiles to simplify conversion
The optimized profiles for iPhone at different resolutions in both iPhone converter software are the express conversion solutions for you. What you need to do is just to choose the profile

you want, no further settings needed.

Trim file to get a segment
If you want to remove the ads, trailers from the movies, or just reserve the highlight in the video, then set the start time and end time or duration to convert the right segment you want.

Split file to get several segments
To make the output files fit your iPhone, try to split a large file into several smaller segments with no compression.

Diversify output files with custom settings
For satisfying diverse demands, both iPhone converter software products provide many parameters like video size, bit rate, frame rate, etc. for you to customize, and you can edit ID3 tag of the output MP3 files to manage music files conveniently.

Preview and snapshot
Preview the video and DVD movie to be converted, and take snapshot when it comes to your loved picture.

Multithreading and batch process
The support of multithreading and batch conversion makes the DVD to iPhone conversion and iPhone video conversion quicker and handier.

High DVD ripping and video converting speed
>200% conversion speed is provided in the DVD to iPhone ripping and video to iPhone converting processes, and the conversion speed will be improved with better performance of your Mac system.
