Easily convert HD videos to your multimedia devices with this amazing HD converter for Mac, and heartily enjoy HD videos on your multimedia devices now.

Key Functions

Play HD videos with HD devices

Convert High-Definition videos to HD AVI, H.264/AVC, HD MPEG4 TS, HD MPEG2 TS, HD WMV, HD Quick Time, HD WMV videos on Mac, and enjoy deeply vivid HD movies on HD devices.

Watch HD videos on portable multimedia devices

Transform HD to SD videos on Mac for transferring to your portable digital devices, such as convert AVCHD to AVI, MPEG, WMV, etc. Clearer visual feast for you on the go!

Make general videos/audios suitable for multimedia devices

A wide range of general video/audio formats are supported by the Mac HD video converter as well. Convert between general video/audio files, extract audio from video, and enjoy them on your devices.

High Mac HD video converting speed

4Media HD Video Converter for Mac provides you with the optimal conversion speed according to your Mac configuration, thus you can convert HD videos with the least time.

Key Features

Classified and optimized profiles preset

The preset profiles are classified by device type (iPod, iPhone, Apple TV, PSP/PS3, Xbox,

PMP, mobile phone, etc.), common use and user defined for you to choose the most applicable one quickly, and all the parameters of any profile are optimized to fit your device most.

Customize profile parameters for special demand

The video and audio parameters can be adjusted to create a new profile that fits your special demand. You can save the modified as a user defined profile.

Clip HD video

This feature allows you to pick out all clips you prefer and discard those odds and ends, and if you want, merge those clips into a new video. Outputting them separately is available as well.

One source to many targets

To realize the dream of one source to many targets at the least time possible, you can set many profiles on one source at one time with this Mac HD converter software.

One large video to many small clips

File too large? Then specify a split file size or time length, and let the program split the file into several clips automatically when converting HD videos.

Output file with specified size

Never trouble with outputting file with specified size once with the built-in Bitrate Calculator. Just enter wanted file size, and promptly get the corresponding bit rate.

Multithreaded and batch HD video conversion on Mac

Support process many Mac HD video converting tasks in batches at one click.

Auto update checking

Specify the HD video converter Mac software check for updates automatically at the intervals of the period you choose.

Available interface languages

The HD converter for Mac is available in English, French, German, Japanese and Chinese.
