AnvSoft iPod Movie Maker transfers your digital camcorder tapes and various video files into high quality movie playable on iPod. It is a video editing and MPEG-4 video file converting software. With ANVSOFT iPod Movie Maker, you can capture video clips from your camcorder, add various video files, edit your home movies right on your computer and turn your digital media into memorable projects on iPod to share with family and friends.

It's so easy that anyone can use it - No need to learn to work with complicated software, AnvSoft iPod Movie Maker works in just a few quick steps and takes only minutes, even seconds!

AnvSoft iPod Movie Maker is the easiest and quickest way to turn your videos into high quality movies playable on iPod. It enables you to build your movie with a few simple drag-and-drops, delete bad shots and include only the best scenes and then export your movie to iPod playable movie files. You can even edit and combine popular file formats including AVI, WMV, ASF, MPEG and many more. It transforms raw videos into professional-looking movies and convert them to MPEG4 format playable on iPod. This really comes in handy and saves a lot of time, when you want to create something truly unique from multiple media sources.
