Why choose ArcSoft Low Light NR?
The most image details recover, gain the unexpected.

- Advanced Multiple Frame NR technology helps reduce noise while acquiring more details from sets of photographs taken in burst mode
- Accurately and efficiently removes noise from Canon 5D Mark III/Nikon D600/Nikon D3S etc., supports a wide range of images from mobile phone cameras to high-end DSLR cameras
- The fastest processing speed based on cutting edge algorithm, one click to group your photographs, and save your time
- The must-have mate for every professional and amateur photographer

30% off on ArcSoft New Release Product -- ArcSoft Low Light NR (with coupon ARCCJ30, expires: 01/15/2013)

Key Features

What is Low Light NR?

ArcSoft Low Light NR is an innovative image noise reduction application which based on the latest Multiple Frame NR technology (MFNR). Using sophisticated algorithms Low Light NR combines individual frames to produce one high-resolution image, acquiring more graphic information than it is available from a single photograph. Thus, It greatly reduces the visible noise while improves the image quality efficiently by processing sets of photographs taken in burst mode.

The latest MFNR technology

- Multiple Frame NR technology is a new and sophisticated noise reduction technology. So far, it has only been available on a few newly released digital cameras. The amazing result has won general admiration from many professional photographers.
- Based on MFNR technology, ArcSoft has developed its first low light noise reduction application. With ArcSoft Low Light NR, you don't have to spend money on upgrading cameras, this easy affordable software can remove image noise perfectly.
- Leave the heavy tripods at home and travel light; take your photos with the ISO and shutter speed you desire, ArcSoft Low Light NR will offer you unexpected results during your post-production.

Smart group, one-click noise reduction

- Low Light NR acquires more details from a sequence of images into a single selected picture, intelligently recovers details from random noise, fixed pattern noise and banding noise; no ghost guarantee.
- The noise reduction coordinates with sharpening so that edges are sharpened well with more details recovered.
- "Auto group" helps you pick the best shot images under the same ISO values automatically.

Advanced editing tools and sharing

- Adjustable noise level to put you in control.
- White balance, saturation, contrast, tone of photo and more settings can be easily adjusted.
- Crop and straighten photos, then share them on Facebook, Flicker and Twitter

System requirements

Supported OS	Windows XP (SP2 or SP3), Windows Vista, Windows 7, Windows 8
Processor	Pentium IV 3.0 GHz or above or Equivalent AMD Athlon®
RAM	2G DDR2 RAM or above
Hard Disk	100 MB free hard drive space required for program installation
Display	1366 x 768 pixels, 32-bit or higher recommended

Language Support

English

Supported Input File Formats

JPEG, Tiff

Supported Output File Formats

JPEG, Tiff
