### Why choose Arcsoft Perfect365?

- One-Click Style Templates
- Achieve a Natural Look
- Instant Multi-Face Detection
- Show Off and Share
- Online makeover

Arcsoft has just released its new product Perfect365, a portrait retouching and one-click makeover application. The software isn't a traditional photo editor, instead it automatically detects faces with over 87% of auto-detect accuracy in images and lets people make cosmetic changes, like face reshaping, teeth whitening, eye brightening and blemish removal. It also lets people add makeup, which could make it useful for testing out new looks. Currently, both Windows version and Mac version are available.

## Key Features

### One-Click Style Templates

All it takes is one click to refine your photos. Apply a pre-set template to quickly touch-up your photos. It's easy and fun! Click the Get More button to add additional pre-set style templates to the collection.

### Achieve a Natural Look

Let Perfect365 highlight your natural beauty with touch-up, make-up, and face enhancing tools. Glamorize your eyes with a hint of color, emphasize your brows, or whiten your teeth. The look is subtle and natural.

### Instant Multi-Face Detection

With Perfect365 PC version, up to 20 faces in a photo are instantly detected. Our software even detects slightly tilted heads or faces covered with sunglasses. Just import a group shot and find everyone's good side!

### Show Off and Share

Collect and share new looks with friends and family. Save your makeover and post your transformed photos on Facebook, Twitter and Flickr. Upgrade to our full version for only \$29.99 to save and print your photos in the original resolution.
