Ashampoo® Burning Studio 10 is even better authoring capabilities for building video and audio discs using the latest formats. HD and Full HD video (720p and 1080p) are now fully supported for Blu-ray discs, and all the encoding is handled by Ashampoo Burning Studio 10. All the authoring tools have been overhauled and the video encoding quality is even better than before. You now use the same new integrated editor for building DVD and Blu-ray video disks with menus. The program also starts more quickly and is generally snappier to use.

In addition to this there is a new Autoplay Editor module with which you can build auto-starting data discs with attractive interactive menus – for example for collections of programs. And there is now also a new Audio Player with which you can play audio files and audio CDs without leaving the program.

Key Features

Burn and update data discs

Burn data to CD, DVD or Blu-ray discs and update previously burned discs by adding and removing files and folders.

Back up your data to single or multiple discs

Back up your valuable data to one or more CD, DVD or Blu-ray discs. Single backups can span multiple discs. Restore your backups in a single easy operation.

Rip and burn music

Rip music from CDs and burn music to audio CDs and MP3 or WMA discs on CD, DVD and Blu-ray in a variety of formats. Encoders for all supported formats included.

Burn movies and photos to DVD, Blu-ray and data discs

You can create slideshow with photos or video clips and you can author and burn Blu-ray video discs in HD and Full HD, video DVDs, and data video discs. Video files are automatically converted to the necessary formats.

Create high-quality slideshows

Turn your photos into impressive DVD/Blu-ray slideshows with titles, transitions and background music.

Copy CDs, DVDs and Blu-ray discs

Just insert a disc, select Copy and go to make a perfect copy.

Create and burn disc images

You can both create and burn ISO, CUE/BIN and Ashampoo's own special ASHDISC image

formats.

Create auto-starting data discs with interactive menus

Build data discs that start automatically when inserted and display a multi-page menu with background music. Include links to disc content, mail programs, web pages etc. Build discs with stand-alone or web browser menus.

Erase rewriteable discs

Quick and easy erase functions for reusing rewriteable discs.

Expert burn functions for full control

Burning experts can create modified copies of existing discs (read in data structure and make changes and additions) and burn discs of all kinds with full control of all main configuration options.

Create covers and labels

The full-featured cover and label designer prints to labels or directly to printable discs. It comes with a selection of point-and-click themes for instant results and easy-to-use creative tools for designing your own layouts.

System Requirements

Betriebssystem:

- Windows® XP, Windows Vista™, Windows®7
- Unter Windows® XP, Windows Vista™ sowie Windows®7 müssen Sie über volle Administrator-Rechte verfügen, um dieses Produkt installieren zu können.
- Grafikkarte: Min. Auflösung 800 x 600 mit 1 MB Speicher und 16-bit Farbe (High color),
- CD-/DVD/BD-Brenner.
- Empfohlen für Video Discs und Diashow Discs: DirectX 9 kompatibler Grafikprozessor mit Hardware Pixelshader v2.0 Unterstützung, Min. Auflösung 1024 x 768 mit 128 MB Grafikkartenspeicher und 32-bit Farbe (True color).

CPU:

- 1200 MHz (oder höher) x86/x64 CPU, 3000 MHz empfohlen für Video Discs und Diashow Discs brennen.
- Speicherplatz:
- 128 MB RAM (2 GB für Blu-ray Video),
- Festplattenkapazität 120 MB, zusätzlicher Speicherplatz, falls Image- oder temporäre Dateien erzeugt werden sollen (8 GB empfohlen, 50-100 GB für Blu-ray Video).
- Empfohlen für beste Leistungsfähigkeit: 1 GB RAM oder mehr.

Software:

- Windows Media Player 9 oder höher empfohlen, DirectX 9.0c erforderlich für Grafikprozessor
- Beschleunigung.
- Um die LightScribe-Technik nutzen zu können, wird die LightScribe System Software

1.17.90.1 sowie

- Microsoft .NET Framework 2.0 und .NET Framework Service Pack 1 benötigt.
