AV MUSIC MORPHER GOLD 5.0 makes editing audio and doing DJ tasks just a snap. It is packed full of powerful features including a brand new virtual DJ, a new Converter module, a multi-track recorder and editor, a whole suite of professional effects and our famous patented vocal Remover and Extractor. The DJ module helps users do simple DJ tasks such as re-mixing songs, adding sound FX, adjusting channels, EQ or any one of the hundreds of included studio-quality effects. The Converter module helps convert multi-format audio files more quickly and conveniently. The Morpher module and Advanced module are newly combined, and a new compact player mode are only some of the great improvements in this version 5.0 for the convenience of the users.

The program is promising to turn any humble PC into a fully-fledged recording studio, giving users the power to make their own pop songs, funky hip hop, or DJ remixes. When a user has finished his masterpiece, there's a ready-to-use CD burner for him to burn his favorite songs to CD and share them with his friends.
