Cool DVD Player is a high-definition DVD player software which supports multiple video formats. The latest decoding technology makes your computer a perfect HD video & audio playback platform.

Meanwhile, **Cool DVD Player** is a complete compatible media player and it can support a wide variety of video formats including **HDTV, DVD, VCD, MPEG1/2/4, AVI, RM, MOV, MP3** etc. Cool DVD Player can be extensively compatible with hardware, which performs stably and smoothly under popular O/S such as **Windows 2000\XP\2003\Vista**.

New Features

- Compatible with Windows Vista.
- The current verification system is compatible with the old registration code. That means users can activate the latest version with the old registration code. Upgrade is absolutely free.
- The problem of dual network adaptors has been solved

Features of Cool DVD Player

- **Complete wrong correction, Do the best from disk reading, disk navigation, decoding and playback.** Many kind of playback software will be halted and lead the system to non-responding because of the low-quality and the bad track of the disc. The users will often meet those problems. **Cool DVD player** adopted the direct disc reading technology which can avoid the deadly reading, non-responding of the system and the exiting of the disc.
- **Peaking and several deinterlacing process make the image playback so clear.** Super DVD image optimization offers high strength smooth playback by removing screen burrs and dithering. Cool DVD player dual-core version supplies the senior options which can effectively reduce the virtual images phenomena and bring the precise, soft and exquisite image.
- **Completely support VCD and DVD navigation.**
- **Can determine disc type** in the DVD drive automatically and choose the right play mode for DVD titles, video CDs, audio CDs or DivX/XviD Discs. Auto-resume and Bookmarks let you jump right to the last viewed location of DVD.
- Support the HDTV video files. **Cool DVD Player** supports resolution 1280 x 720 (720p) or 1920 x 1080 (1080p), high resolution ratio reaches MPEG-2 Video and WMV-HD (Windows Media Video High Definition)

Functions of Cool DVD Player

-
- **Cool DVD player supports up to 32 roads subtitles.** Playing window menu during playback-"subtitle selection" items list all the subtitles options provided by DVD and the position can be dragged by moving the mouse. Cool DVD Player has unique subtitles editor supports color changing, transparency, zoom, intelligent line break, subtitle boundary peaking, subtitle size adjustment, subtitle bright part edition and background part edition and subtitle precision processing.
 - **Powerful Capture Function.** Cool DVD Player adopt BICUIC-BSAMPLE technology zoom freely, clear and sharp and it also can browse and save the pretty pictures from your favorite movie
 - **Smart Stretch** let you enjoy any movie with 16:9 aspect ratio on any screen mode, without distortion.
 - **Powerful audio effect.** Completely supports AC3, DTS ,MPEG,LPCM and other encoding formats, also spectrum enhancement later effect added. Support 5.1/6.1/7.1 stereo.
 - **Powerful image color temperature adjustment function.** Including luma, contrast, UV chroma and saturation.
 - **An PC layer support background playback.** Desktop Video enables you to watch DVD and work simultaneously!

Practical DVD navigation function. Cool DVD player supplies Navigation/Directly play/playlist, 3 options in total. Directly playing can help you skip the redundant header of the movie. Many media players will breakdown if the navigation information is damaged, but Cool DVD player can automatic switching to playlist mode to play the media file in disk, still could continue to play the movie. Maximize the probability of playing disk. Using player control dialog-general page to activate directly playing function.

System Requirements

- Operation System: Windows 2000? Windows XP, Vista, DirectX 9.0 or higher.

Lowest hardware requirements

CPU

- HDTV(1920*1080) :MMX 1600MHz
- DVD(720*480/576): MMX 166MHz

Video Card

- HDTV(1920*1080): HDTV compatible, 32M
- DVD(720*480/576):8M
- VCD(352*288/240):2M

Memory

- HDTV(1920*1080): 128M
- DVD(720*480/576): 64M
- VCD(352*288/240): 16M

Hard Disk

- HDTV(1920*1080): 100M Install Space
- DVD(720*480/576): 100M Install Space
- VCD(352*288/240): 100M Install Space

CDROM

- HDTV(1920*1080): 8x DVD ROM
- DVD(720*480/576): 4x DVD or higher ROM
- VCD(352*288/240): 4x CD ROM

Recommended Environment

CPU

- HDTV(1920*1080): MMX 2400MHz
- DVD(720*480/576): MMX 1000MHz
- VCD(352*288/240): MMX 300MHz

Video Card

- HDTV(1920*1080): HDTV Compatible, 64M
- DVD(720*480/576): 16M
- VCD(352*288/240): 4M

Memory

- HDTV(1920*1080): 256M
- DVD(720*480/576): 256M
- VCD(352*288/240): 64M

Hard Disk

- HDTV(1920*1080): 100M Install Space
- DVD(720*480/576): 100M Install Space
- VCD(352*288/240): 100M Install Space

CDROM

- HDTV(1920*1080): 8x DVD ROM
- DVD(720*480/576): 4x DVD or higher ROM
