The **Cucusoft iPod Video Converter Suite** is an all-in-one iPod video conversion solution. This suite includes two software packages, the "**Cucusoft iPod Video Converter**" and the "**Cucusoft DVD to iPod Converter**", so with this single package you can convert both DVDs and video file media to iPod video and iPod movie formats. You will be able to enjoy your favorite DVD movies and video clips on your iPod wherever you go.

The **Cucusoft iPod Video Converter Suite converts DVD to iPod directly**. Some other software needs two steps, one to convert DVD to avi, and a second to convert the output avi to iPod. That solution wastes a lot of your time. Our software needs only one step, because it directly converts video DVD to iPod format, which results in an exceptionally fast conversion speed.

Note that this package also converts to iPhone, Apple TV, iPod touch and iPod video nano.

Now you can get this DVD to iPod converter suite **at a very competitive price!**
