Are you a big fan for iPod? Now **DVD X Studios iPod Converter Suite** is special for you. This suite includes two powerful tools: **iPod Video Converter & DVD to iPod Converter**. iPod Video Converter can help you convert videos, audios and images to your iPod while DVD to iPod Converter can help you convert DVD movie discs to your iPod. Almost all iPod models are supported such as iPod Classic, iPod Nano, iPod Touch, etc. With this suite, you can do more on your iPod.

### **iPod Video Converter**

One of the tools in iPod Converter Suite is iPod Video Converter which is professionally designed for converting video, audio and image files into iPod. This tool is featured with:

- Converting various video formats into iPod-MP4
- Converting all audios formats into iPod-MP3
- Converting widely-used image formats into JPEG
- Automatically detect your iPod .
- Flexible locations to choose.
- Split a large video file to smaller video clips to fit your device memory.
- Extract sound tracks from video and save as MP3 format .
- Playback added video/music/image files directly.
- Real-time display the whole conversion process with detailed information
- Support batch converting simultaneously which could save your time.
- Quickly open destination folder that you can access the converted files immediately.
- Turn off PC after converting finished.

### **DVD to iPod Converter**

Another tool in this suite is DVD to iPod Converter which is specially designed to convert DVD movies to your iPod. It could help you remove the copyright protection on the original movie discs and lets you convert them into iPod-MP4 format. Moreover, it provides you with 3 different converting modes (Entire Disc, Main Movie, and Customize) which allow you to converting any part /title/chapter of the original movie disc.

- Entire Disc converting mode: This converting mode lets you convert whole movie disc into iPod-MP4 without any parameter deleted.
- Main Movie converting mode: This converting mode will automatically detected main movies part and delete other unnecessary parts such as advertisement, menu, FBI warning and so on to convert.
- Customize converting mode: This converting mode allows you to select any title/chapter on the original movie discs to convert.
- You can easily convert all kinds of DVD to iPod video (MP4) format with highest conversion speed.

- 
- Before converting, you are allowed to set output video type including video resolution, frame rate, bit rate, audio channel, audio bit rate, etc.
  - The Bitrate calculator lets you know the file size and converted video quality before conversion.
  - Clip a certain segment from your favorite movie by assigning the start time and duration.
  - The smart recognizer will display the whole disc content by chapters, thus you can easily find out which part is your preferred.
  - Choose subtitle and audio track from original DVD to play in your iPod device.
  - Ripped or converted files have the same excellent quality as the original DVD disc.
  - A mini window is provided for user to preview the original DVD.
  - Turn off PC after converting finished.
