Why choose DVDFab DVD Copy for Mac?

- Clone/Burn/Decrypt/Copy/Backup any DVD
- Copy DVD-9 to DVD-9/DVD-5, Copy DVD-5 to DVD-5/DVD-9, Copy DVD-9 to DVD-5, Copy DVD-5 to DVD-9
- 8 DVD copy modes are available: Full Disc, Main Movie, Split, Merge, Customize, Customize Split, Clone and Write Data

DVDFab DVD Copy for Mac is powerful and flexible DVD copy software. It enables you to copy DVD with one or two mouse clicks and customize the output with its many flexible settings. DVD Copy for Mac allows you to rip, copy, and burn DVD to a blank DVD disc or backup the DVD content to a folder or ISO file onto your Mac and media server, and compress content to fit on smaller discs, the choice is yours! In addition, the DVD copy speed is very fast, and the quality is excellent.

DVDFab DVD Copy for Mac is definitely a best all-in-one solution for making DVD backup of your expensive DVD collection.

DVDFab DVD Copy for Mac is a combination of DVD copy, DVD cloner, DVD burner, and DVD decrypter that can read, rearrange, and manipulate the content of a DVD to suit your needs.

DVDFab DVD Copy for Mac can remove almost all known DVD copy protections, thus to copy nearly any DVD to your Mac, or to any blank DVD disc, including DVD+R/RW, DVD-R/RW, DVD+R DL, and DVD-R DL, with very fast speed about 10-20 minutes. Plus, it will be constantly updated to remove latest DVD copy protections to support all DVD movies. DVDFab DVD Copy for Mac makes perfect 1:1 ratio DVD clone, and can also compress DVD-9 to a single DVD-5 with amazing output effect.

DVD Copy for Mac also has the ability to copy discs that are badly scratched or damaged. Even if the IFO files can't be read, it will allow you to make a copy of the movie content using "Main Movie" or "Customize" copy modes. It can recover from most VOB read errors and supports NTSC and PAL content (but does not convert from NTSC to PAL or vice versa). In addition, multi-core CPUs are supported by DVD Copy for Mac, so the copy speed is super fast. It also has a worldwide user base and great support in its own forum and from the DVDFab staff via email.

See? DVDFab DVD Copy for Mac is the answer to all your concerns about DVD backup, copy, burning, clone and decryption on your Mac.

Features

Copy Any DVD into Any Blank DVD Disc or onto Mac

-
- **Copy any DVD** - Remove all known DVD copy protections and region code to freely access and copy any DVD.
 - **Copy DVD onto Mac** - You can rip and copy DVD onto your Mac as ISO image file or DVD file folder for DVD backup with DVDFab DVD Copy for Mac. So if you don't have blank disc at hand for burning, doesn't matter, just save your DVD movie on your Mac for later burning. Or you just want to watch the DVD movie on your Mac without swapping discs, it's OK, just copy it to Mac then play.
 - **Burn to any blank DVD disc** - Burn DVD disc or ISO file / DVD folder on your Mac to any blank DVD disc, including DVD+R/RW, DVD-R/RW, DVD+R DL and DVD-R DL.
 - **Clone DVD in 1:1 ratio, or copy with compression** - You can use DVDFab DVD Copy for Mac to copy DVD-9 to DVD-9, and DVD-5 to DVD-5 in 1:1 ratio without any loss, and you can also compress DVD-9 to a single DVD-5 with outstanding quality.

Create Your DVD Backup to Your Specifications

- **8 DVD copy modes available to customize your DVD** - 8 DVD copy modes are available for you to choose how to copy your DVD: "Full Disc" copies the whole content of DVD; "Main Movie" just copies the longest movie title; "Split" copies a DVD-9 to two DVD-5 discs with 100% quality; "Clone" makes perfect 1:1 bit-to-bit copy; "Customize" lets you create a DVD with the very stuff you want; "Customize Split" enables you to copy a DVD-9 to two DVD-5 discs using "Customize" way; "Merge" combines several titles of several sources into one DVD; "Write Data" burns an existing DVD folder or (ISO) image file from your Mac to a blank disc or can also be used to convert a DVD folder to an ISO disc image file.
- **Various settings to personalize your DVD** - There are easy to use settings in DVDFab DVD Copy for Mac that allow you to personalize your DVD backup. For example, you can easily change the default audio and subpicture streams, select different languages, remove annoying content, change the playback order of the titles, copy only a certain range of chapters, choose your favorite burning engine and write speed and many more.

Very Convenient and Easy to Copy DVD

- **Your convenience is ensured all round** - The creators of DVD Copy for Mac work hard to make the product convenient and easy to use. The user interface can be set to many languages, and there are controls to pre-select the languages for audio and subtitles. The progress of the copying is reported in detail and a preview screen lets you see and hear the content before you start the copy process to avoid setup errors.
- **Very easy to copy** - With its friendly interface and intuitive controls, even new users can make a DVD backup with DVDFab DVD Copy for Mac without any problems. The expert user will enjoy the way complex functions can be accomplished in just a few clicks.
