DVDit® Pro 6 is professional, studio-caliber DVD authoring in an intuitive, customizable work environment.

Advanced Menu Creation

Sophisticated motion and audio menu creation lets you adjust brightness, contrast, hue, alignment and drop shadow controls.

Professional User Interface

Flexible UI with dual monitor support lets you easily create DVDs with up to 8 audio tracks and 32 subtitle tracks.

Advanced Navigation

Easily set End-Actions and Alternate End-Actions for Hollywood-like control over title navigation. Plus, get granular control over button navigation.

Professional Output Formats

Output your project to DLT and all DVD media with high-quality VBR encoding and add copy protection and region coding to your projects.

Key Features

DVD Creation

- Advanced transcoding parameters
- Minimum and maximum bit-rate controls
- Dolby Digital 5.1 Pass Through
- Dolby Digital stereo encoding

- DVD-ROM/hybrid disc creation
- DLT creation

System Requirements

- Intel® Pentium® III 800MHz processor (2GHz Pentium 4 recommended)
- Windows XP Professional, Home or MCE Edition, with Service Pack 2. Running Windows Vista? Get DVDIt Pro HD.
- 128MB RAM (512MB recommended)
- Microsoft Windows Media Player 10.0 or later
- DirectX 9.0c
- DVD recorder
- Color video display adapter with at least 16MB VRAM (64MB recommended)
- Monitor supporting 16-bit color at 1024 x 768 minimum screen area (32-bit color and larger screen area recommended)
- Windows-compatible sound card
- 10 GB free hard disk space (20 GB or more recommended).
- QuickTime 6.5 software recommended

Use Windows Update to ensure you have the latest Service Packs and fixes for your operating system, and to get the latest versions of Media Player, DirectX, and Internet Explorer. Some video, audio, and image formats require QuickTime Player 6.5 or later (free download from <http://www.apple.com/quicktime/>). Install QuickTime using the Recommended Installation option.
