Key Features

Support blu-ray disks (BD) and DVD

Blu ray disks (25G/50G) and DVD (DVD-5/DVD9) can be both imported to the software, and converted into popular video/audio formats such as AVI, MPEG, MP4, ASF, MKV, MOV, WMV, FLV, SWF, 3GP, AAC, AC3, MP3, WAV, WMA, OGG, RA, etc.

Preview the movie before converting

Allow you to watch the imported files before converting, and get a general idea of the converted effect. Plus, it makes you clearer about what you have inserted into the ROM in case of time waste.

Freely access to video/audio parameters

If you are not satisfied with the defaulted video/audio effects or your external devices are special for video or audio, the software enables you freely adjust video size, video quality, audio quality and channels before converting.

Merge multiple files into one

If the blu-ray disk has more than one title and you would like to integrate them into one, just click the "Merge" button on the interface to merge the files into one complete file.

System Requirement

- OS Mac 10.5/10.6

-
- Processor 1GHz Intel/AMD processor or above
 - RAM 512MB memory or above
 - Drive Blu-ray ROM
