Blu-Ray to iPad Converter will become popular. Currently many big Hollywood movies are stored on Blu-Ray DVD disc, but a lot of people don't know the difference between Blu Ray and DVD, so firstly let's learn about the advantage of Blu-Ray DVD disc. For starters, the discs have a lot more storage space than regular DVDs. While regular DVDs have only 4.7 GB of space, their counterpart discs can store up to 27 GB. The biggest advantage of Blu Ray over DVDs is excellent picture quality which you can not get the same from standard DVD disc.

Our software recommended on this page, **Emicsoft Blu-Ray to iPad Converter**, is specially designed to convert Blu-Ray movies for the Apple new released tablet computer, iPad. The Blu Ray to iPad is able to rip BD disc and BD folder to iPad supported formats MP4, M4V, MOV, MP3, WAV, AIFF without any image and sound quality loss.

Besides, there are editing functions supported by Blu-Ray to iPad Converter to customize output video. Trim file length, crop video resolution, brighten video, adjust contrast, add watermark, join files and more powerful functions are waiting for you to explore.

Key Features

Convert Blu-Ray DVD to iPad format with Blu-Ray to iPad free download

- Rip Blu-Ray DVD movies for iPad

The best Blu Ray to iPad Ripper can convert Blu Ray to MPEG-4, H.264/MPEG-4 AVC, MOV, M4V, MP3, AAC, AIFF, M4A, WAV format.
