Key Features

- Get DVD disc info from Internet automatically including director, film name, actors/actresses, and year.
- Set the start time and duration of a segment to rip; split one large DVD file into several

smaller DivX, AVI files.

- With Bitrate Calculator, you can specify the output file size you need with the bit rate calculated at once.
- Clone DVD title or add diverse profiles for one original to convert the copies only once at the same time.
- Not only the default but more settings to customize: bit rate, resolution, frame rate, sample rate, codec.
- Running ImTOO DVD to DivX Converter in the background to finish conversion will save much resource.
- Preview any titles before conversion and take a snapshot to save the captured pictures as JPG, GIF, PNG, BMP.
- Offer after-done actions to automatically shutdown, exit, standby, or hibernate after DVD to DivX conversion.
- Support various video aspect ratios: 4:3 and 16:9, multi-language interfaces and sound normalization.
