The Flip Video Camcorder is a portable, easy-to-use solution for creating and sharing high-quality home movies. Flip Video is the ideal choice for capturing everyday moments that happen anywhere, and sharing them with family and friends everywhere.

Flip video camcorder isn't without its drawback. Although you might find the recorded mp4 video files compatible with iMovie and QuickTime on Mac, they just fail you every time when you directly import them to iPod or iPhone. **Flip video converter for Mac** is able to compress flip video to different file sizes with different resolution, frame rate and bit rate to be exactly compatible with iPod, iPhone, Blackberry, etc.

Besides Youtube and Mysapce, **Flip video converter for Mac** provides potential Podcast production assistance to let you post up your own video to iTunes. with the software, you can rip audio either from Flip Ultral video or Fip Mino video and convert to mp3, ogg, aac audio format, you can also convert flip video to flv, asf, 3gp, mpeg-4, mov, m4v, mpg, avi, wmv for your specific project.

Key functions

Supported video/audio files:
