Leawo DVD Copy is created to let the novice computer users make a perfect "1 click DVD copy" of any DVD movie under the high speed and reasonable time. It is one of the best DVD copy software that enables users to copy DVD for the purpose of DVD clone.

It supports to copy DVD for backup from disc to disc, disc to folder and disc to ISO image files, and it supports to import the source DVD movies from PC folder and ISO image as well.

Although a copy-protection technology designed to prevent DVD movies from being copied, this DVD copy software is still able to decrypt the CSS copy protection mechanism on DVD movie discs and copy them easily with just one perfect click.

Key Features

- Copy DVD for backup with the original DVD movie excellent quality unchanged.
- Copy DVD movie to hard disc, to PC folder and to compressed ISO image.
- Support to import the source DVD from the original DVD disc, PC folder and ISO image as well.
- Copy protected DVD commercial movies by decrypting the CSS copy protection mechanism on DVD movie discs.
- DVD movie duplication can be done under the fast speed and reasonable time.
- Copy DVD movies with only one perfect click.
- Neat interface and easy operation.
- Increased control over the DVD copy process
- No system delay and resource hogging.
- Downloadable DVD copy and it requires only a little system space and low configuration.

System Requirement

NT/2000/XP/Vista/Win7
