[Video Converter](#) + [DVD Creator](#)

Easy Video Converter Suite can help you convert video and audio, and create DVD easily and fast on Windows OS.

It is an all-round video converter for video and audio conversion among dozens of popular formats. With optimized profiles, it is very convenient to convert video for popular gadgets, such as iPod, iPhone, PSP, PS3, Zune, Apple TV, Mobile Phone, Windows Mobile, Xbox, Wii and PMP. With extra DVD creation ability of this video converter suite, you can burn your favorite videos to DVD for playback on DVD players freely.

In this super Video Converter suite, you can also do some instant video editing, such as video effect adjustment, duration trimming, video cropping, watermark creation and codec parameter settings.

Key Features

Convert video or audio between popular formats

Easy Video Converter Suite can perfectly convert between video (AVI, MP4, WMV, FLV, RMVB, MPEG, 3GP, MKV, etc.) and audio (MP3, WMV, WAV, AAC, OGG, M4A, etc.) formats. You can make HD video with corresponding profiles as well.

Create DVD to play on DVD player

Besides video conversion, this versatile video converter can convert any video (AVI, MP4, WMV, etc) to DVD format and then burn them to a DVD disc that is playable on DVD players.

One-click output to various portable devices

This portable Video Converter suite provides 100% qualified profiles suitable to many popular multimedia devices, including iPod, iPod Touch, iPhone, iPhone 3GS, PSP, PS3, Zune, Apple TV, Mobile Phone, Windows Mobile, Pocket PC, Xbox, Wii, Archos, Creative Zen and iRiver.

Edit video by Effect, Trim, Crop and Watermark

As a magic Video Converter, it comes with unique video editing functions: Effect, Trim, Crop, Logo and Text. With these easy-to-use features, you can adjust video effect (brightness, contrast, flip, audio volume, etc.), cut video duration (in millisecond precision), crop video size and change aspect ratio as well as add watermark (image or text).

Built-in preview and one-click screenshot

You can play the imported videos in the built-in player and snap the frame picture to save as JPEG, BMP or THM image files.

Merge multiple files into one single file Input as many video files as you want and easily merge them all into one single video file.
