The make-to-measure PowerPoint-to-Video converter, **Leawo PowerPoint to iPad**, is designed for the being-a-hit tablet computer, iPad. Beyond what the name suggests, this reliable PowerPoint-to-video converter can convert PowerPoint files to video in the formats that are not only compatible with iPad, but also iPhone and iPod Touch. It can retain all the animations, sounds, slide transitions and movie clips in the source PowerPoint documents.

With the help of this professional tool, you can fast and faithfully convert anything made in PowerPoint, such as work schemes, courseware, lesson notes, reports, photo gallery, to video for watching them in iPad, or send the video to your relatives and friends who also have the same device.

Key Features

- **Ideal for iPad** - Support various video output formats, including MOV Video (*.mov), MPEG-4 Video (*.mp4), MP4 AVC (*.mp4), iPad HD Video (*.mp4), iPad Video H.264 (*.mp4), iPad Video MPEG-4 (*.mp4), making it suitable for iPad, iPhone and iPod Touch. In addition, user-defined output formats are also supported.
- **Compatible with PowerPoint 2010** - Support PowerPoint 2000 or higher versions, including the newly-launched PowerPoint 2010, as input resources. Satisfy with the needs of the majority of customers using different PowerPoint versions.
- **Convert at fast speed** - Benefiting from batch conversion and accurate codec for PowerPoint, the PowerPoint to iPad converter lets you make the best use of your multi-core processor power.
- **Support batch conversion** - Up to 12 PowerPoint files can be processed to separate video files for each input PowerPoint file per conversion. The input file formats include *.ppt, *.pps, *.pot, *.pptx, *.ppsx, *.potx, etc.
- **Extract and convert PowerPoint to audio** - Draw a sound from PowerPoint and turn it to a different audio format, e.g. *.aac, *.m4a, *.mp3 and *.wav. It is suitable for those who would like to reuse an embedded sound object in their PowerPoint presentation to other Apple devices.
- **Multi-lingual Graphic User Interface** - Set with a neat GUI in seven languages, i.e. English, French, German, Italian, Japanese, Simplified and Traditional Chinese, which is convenient for you to undertake operation.
- **Retain all original elements** - Keep everything from original PowerPoint to output video, particularly dynamic effects like music, flash, movie clips from a selected PowerPoint file to final video. You can modify the video settings in the Profile.
- **Reserve linked pictures** - With the help of assistance video codec, it can process a PowerPoint presentation with linked pictures to video as it was. You won't bother brains about packing the source image files and the presentation in the same folder.
- **Insert background music & record real-time narration** - The Music feature allows

you to add a sound or record your voice for the video slideshow. You can insert as many soundtracks as you like.

- **Process fast and precisely with a Timeline** - Convert your all-ready presentations in no minute. Display the exact process of each PPT file with precise conversion time.
