Convert PowerPoint files to video in most formats. **Leawo PowerPoint to Video Pro** is a wonderful conversion program that assists in converting your PowerPoint presentation to quality video for uploading to video hosting websites like YouTube and playing on portable devices like iPhone, while retaining all the animations, transitions, sounds, webcam videos and internal hyperlinks in source PowerPoint.

The PPT to Video expert tool offers an innovative way for you to deliver anything made in PowerPoint, from Math homework to Makeup ads, from courseware to church sermons, fast and faithfully to the recipients via a video-welcome site.

Key Features

Convert PowerPoint to video of 23 formats - Transfer your PowerPoint to the video you prefer. Create a variety of video slideshows, regular ones including ASF, AVI, FLV, MPEG, MP4, TS, MOV, WMV, VOB, 3GP, and rare ones like RM, RA, MKV, MKA, Wii AVI, Wii MOV, NDS DPG, NDS DPG2, NDS DPG3 and NDS DPG4.

(New!) Support recent PowerPoint 2010 as input - Output PowerPoint 2010 presentations to 22 video file formats other than WMV. Good for MS Office fans who want more video copies of their PowerPoint 2010 presentations.

Reserve linked pictures from PowerPoint to video - With enhanced video codecs, it can process a PowerPoint presentation with linked pictures to video as it was. You won't bother to packing the source image files and the presentation in the same folder.

Convert PowerPoint to video in minimum time - Benefiting from batch conversion and accurate codecs for PowerPoint, the PPT to Video Converter lets you make the best use of your multi-core processor power.

Batch Conversion for 2000 and later PowerPoint files - Process up to 12 PowerPoint files to video per conversion. The input file formats include PPT, PPS, POT, PPTX, PPSX, POTX, etc. Create a separate video for each input PPT file.

Convert PPT to video for multiple web services

Export a PowerPoint presentation to popular web video like Audio Video Interleaved, Flash Video, Windows Media video, Apple QuickTime Movie and more, making it accessible on YouTube, Google Video, your blogs and many other video sharing sites.

Output video by diverse end-devices - Apart from specific video file format, it also offers non-tech savvy users a comfort to choose a proper video output - to choose by terminal

device of their PowerPoint video, which features Apple TV, Blackberry, iPod, iPhone, PSP, PS3 (HD support), Pocket PC, Zen, Zune, XBOX, and etc.

Extract and convert PowerPoint to audio - Draw a sound from PowerPoint and turn it to a different audio format, e.g. *.aac, *.ac3, *.mp3. Sweet for those who would like to reuse an embedded sound object in their PowerPoint presentation to other media devices.

Multi-lingual User Interface for easier conversion - It is set with a neat GUI in 7 most-spoken languages, i.e. French, German, Italian, Japanese, Simple and Traditional Chinese, to give you quick access to your video slideshow.

Keep everything from original PowerPoint to output video - Retain all original elements, particularly dynamic effects like music, flash, movie clips from a selected PowerPoint file to final video. You can modify the video settings in the Profile and make your own.

Insert background music & record real-time narration - The Music feature allows you to add a sound or record your voice for the video slideshow. You can insert as many soundtracks as you like.

Process Fast and Precisely with a Timeline - Convert your all-ready presentations in no minute. Display the exact process of each PPT file with precise conversion time.
