The first Blu-ray player can support both Mac&PC system

Mac Blu-ray player, the world's first blu-ray player for Mac, is the unique video conversion tool that supports both Mac and Windows systems. It is its birth that

finishes the history that Mac cannot play bluray disc. It is powerful and distinguished. Mac Blu-ray player is able to support all mac models, including not only macbook pro, air, mac mini, but also imac and mac pro. Therefore, with this blessing tool, current Mac users are available to enjoy their favorite bluray movies in fun on their beloved Mac devices.

Perfect supporting Blu-ray decryption and is capable of removing AACs, BD+ without limitation

With advanced Blu-ray decryption and processing capability, Mac Blu-ray Player can decrypt any blu-ray discs successfully as well as DVD. The Mac Blu-ray Player is possible to read commercial Blu-ray discs released in different regions, as well as removing BD+ and AACs encryptions from latest Blu-ray movies. It allows users loading commercial blu-ray discs directly from Blu-ray Disc and Blu-ray Folder. Also, Mac Blu-ray Player is able to play DVD discs. It supports DVD decryption and DVD menu.

Outstanding universal performance. Play anything including movie, video audio, music and photo.

Mac Blu-ray player is a manifold device. It can support almost all formats of files. Mac Blu-ray Player is able to play not only movies and videos but also audios and music. What's more, it can browse photos in innovation. Mac Blu-ray Player kept easy to understand and navigate with user-friendly interface and nice layout. Although there are complex codecs and hardware acceleration techniques working in the background, we tried to keep the front end simple enough for users with any level of computer knowledge.

Support playback of blu-ray or DVD movies in ISO image format

Mac Blu-ray player plays not only blu-ray or DVD discs but also their ISO files. If there is a movie in ISO format in your computer, open the Mac Blu-ray Player and click on the "Open file" button. An interface then will pop up. You can select the file you want watch and start playback directly. It is easy to understand and navigate. Despite of the complex codecs and hardware acceleration techniques working in the background, we tried our best to present the most simple and convenient front for users.

Powerful High-Definition video player and hardware acceleration available.

The uniqueness of this tool doesn't end at the fact that it is the very first Blu-ray player for Mac. With the arrival of this one of a kind Mac Blu-ray player, Mac users will now be able to enjoy Blu-ray quality and experience on their desktop. Mac Blu-ray Player can directly play Blu-ray and DVD movie without any quality loss. Mac Blu-ray Player keeps the outputting video with the high-definition quality without loss of data and frame. It allows full preservation of all audio tracks (like DTS HD Master Audio, Dolby TrueHD Audio, etc.), subs streams, chapter markers and videos. Especially, it also supports NVIDIA's CUDA acceleration technology.

DTS5.1 guarantees super high quality of output.

It is well known that DTS5.1 can guarantee super high quality of the output. Mac Blu-ray Player does support DTS5.1 for Mac initially in the world. At present, Mac Blu-ray Player can support DTS5.1 in v.1.9.5 and its upper versions for Mac platforms as well as Windows. It is DTS5.1 that make Mac Blu-ray Player even better. After adding DTS5.1 into it, Mac Blu-ray Player can bring your Mac or PC to the most fantastic HD video enjoyment.

All media formats supported.

Besides it is the world's very first blu-ray player for Mac, Mac Blu-ray Player is the most powerful and distinguished blu-ray player at present. Mac Blu-ray player is able to play anything here no matter the formats or categories. It can not only play Blu-ray HD movies on Mac or PC, but support all formats of movie, video, audio, music and photo that exist today, including Blu-ray, DVD, VideoCD, MOV, MKV, AVI, FLV, WMV, MP4, MPEG, RMVB, MP3, WMA, AAC, AC3 and more.

Share movie or video information with friends anywhere and anytime.

Mac Blu-ray Player is the unique and universal blu-ray player for Mac. It is an amazing and powerful blu-ray player with distinguished functions. One of the very distinctive features of this multi-purpose universal Blu-ray player is its 'share' function. With this function, you can recommend the movie you like to all of your friends anywhere and anytime. Also, post your suggestions or reviews about the movies to Facebook or Twitter through the 'share' button.
