mediAvatar iPad Video Converter can convert movies and videos to play on your iPad so you can catch up on your movies even on-the-go. Enjoy excellent video and audio quality even after fast video to iPod conversion! Decode just about all popular HD and SD video formats such as AVCHD (*.mts, *.m2ts), H.264/MPEG-4 AVC, AVI, MPEG, WMV, DivX, MP4, MOV, RM, RMVB, ASF and 3GP which are converted into 720p H.264 HD or H.264 & MPEG4 & MOV formats.

Extra features: extract audio from videos on iPad; convert in multi-core processors; batch-conversion and multithreading.

Download mediAvatar iPad Video Converter for free now. It couldn't be easier!

Main Features

HD Video to iPad Converter
Supports most HD video formats (including AVCHD (*.mts, *.m2ts), H.264/MPEG-4 AVC, MPEG-2 HD, MPEG-4 TS HD, MPEG-2 TS HD, Quick Time HD, WMV HD and AVI HD) as input, and converts them to iPad video in H.264 HD (720p), H.264 or MPEG4 format.

iPad Video Converter
Converts just about all general video formats (such as MPEG, WMV, DivX, MP4, MOV, RM, RMVB, ASF, 3GP, and AVI) to iPad H.264 & MPEG4 & MOV videos.

iPad Music Extractor, iPad Music Converter
Extracts iPad music in MP3, WAV, AAC or AIFF format from video files; converts other music formats such as MP2, WMA, RA, AC3, OGG, APE, and CDA to iPad audio.

Picture to iPad Video Creator
Put your favorite pictures together to create a photo-video to play on your iPad.

Video Image Snapper
Batch capturing pictures from a video file at regular intervals or take a snapshot during video previews.

Key Features

Multi-Core Processing, Multithreading, Batch Conversion
Supports multi-core CPU processing; offers higher speed if you have enabled more CPU

cores; converts multiple files to iPad videos and music at the same time.

Optimized Conversion Profiles
All conversion profiles are optimized parameters. Choose one as the output format without changing any settings!

Rich Output Parameters
The output parameters (such as bit rate, frame rate, sample rate, channel, codec, aspect ratio and so on) of any profile can be freely adjusted. You can save the modified parameters as your own profile.

Segment Extracting
Just want a certain segment from a video? Set the clip's start time and duration to extract and convert it to iPad video or music.

File Splitting
Choose a preset split mode or customize your own split mode to split a file into several clips.

Multiple Outputs from One Original
To save time set multiple conversion profiles for the same file and convert them simultaneously.

Free Output File Size Adjusting
Adjust the output file size freely by entering the size you want in the Bitrate Calculator which will compute the corresponding video bit rate.

Auto Post-Conversion Actions
Preset the converter to exit, shut down, hibernate or put on standby your system automatically after a task is complete.

Background Run
Spare CPU resources for other important running applications by setting mediAvatar iPad Video converter to work in the background.

Multilingual Interfaces
Available in four language interfaces: English, German, French, Spanish.
