Key Features

Convert Audio

Transfer unprotected audio between popular formats

- With AudioSuite, you're just one click away from listening to your favorite tracks on your mobile device: simply add file, choose format and hit the Convert button!
- Convert between MP3, WMA, WAV, OGG Vorbis, and AAC formats.
- Note: Movavi AudioSuite does not allow you to convert protected materials.
- Ready-made presets await your creative impulses: magic sounding or compact size - just choose the one that suits you best.
- Take advantage of fully customizable output parameters for optimum size and quality balance: set codec, sample rate, and the number of channels you need.
- Get super-fast media conversion technology with support for multithreading and batch conversion.

Record Audio

Record voices, music, and other audio sources

- Record audio from microphone, audio CDs, broadcasts, programs, and other sound card inputs.
- Play output audio from right inside the program to check the quality of the recording.
- With just one click, you can specify bitrate, frequency and number of channels: use convenient, ready-to-use configurations.

Rip CD

Rip unprotected audio CDs to your preferred digital format

- Rip audio tracks from your CD collection to WAV, MP3, WMA, AAC, or OGG files.
- Choose the appropriate preset to get the output file quality you want.
- Fine-tune format settings to specify bitrate, sample rate, and audio codec.

Online Video to Audio

Save your favorite soundtracks from online videos.

- Save audio streams from popular websites.
- Convert URLs individually or in batches.
- No more switching back to the web browser: now you can play related videos in the Preview area, and it's quick and easy to add more videos!

Extract Audio

Extract audio from unprotected DVDs and other video sources

- Listen to your favorite movie theme on your mobile device or make it speak with the voice of a star!
- Extract audio from all popular video file formats: AVI (DivX, XviD, etc.), DV AVI, MP4, WMV, ASF, 3GP, 3GP2, 3GPP, 3GPP2, QuickTime (MOV, QT), DVD, VOB, IFO, VIDEO_TS, AUDIO_TS, MPG, MPEG 1,2,4, MOD, DAT, MJPEG, VCD, SVCD, H.263.
- Friendly intuitive interface makes it easy to access every option you might need: previewing, fragment selection, fine tuning, and more.

Burn Audio CDs

Burn audio CDs for CD players and music centers

- Burn audio CDs to listen in your car or at home on any CD-player, music center, or car stereo.
- Take any audios - MP3, OGG, WMA, whatever - and convert them to CD audio format automatically!
- What kind of mood are you in? Dark? Calm? Positive? Energetic? Choose from a chart of songs and burn a special mix audio CD for the way you feel.
