|-------------------|---|

Video to iPhone Converter is a iPhone video converter that converts all popular video files, P2P file-sharing, YouTube videos, movies and DVD's so you can play them on your iPhone. It can convert all types of video files such as rmvb, avi, divx, xvid, flv, x264, vob, mpeg, mpg, YouTube, mp4, PSP, vcd, asf, svcd, dvd, m4v, rm, vob etc.) into the proper video formats (MPEG-4, H.264) that play on the iPhone.

With **MovieSoft Video to iPhone Converter** you can convert videos for any type of iPhone. This includes the new iPhone 3G, and original iPhone. You can also convert videos for the iPod Video, iPod touch, iPod nano and iPod classic.

## **Key Features**

### **Support all popular video formats**

The input files support all popular video formats, whatever input files you have, such as DivX , XviD , MP4 , RMVB , RM , MPEG2 , MPG , AVI , iPod , iPod Touch , PSP , Zune , iPhone , DV , 3GP , 3g2 , WMV , MOV , MPEG , VCD , SVCD , DVD , MPEG1 , ASF , FLV , Animated GIF , M4V , VOB , AMR , M4A , Compressed AVI, etc. you can input them to our program and convert them to iPhone MP4 format with MPEG-4, H.264 codecs.

### **Very easy to use**

Following the magic arrow wizard, very easy to use that only two clicks are enough to convert any Video files to iPhone MP4 format.

### **Fast conversion speed**

Super fast conversion speed provided, auto-detect your CPU. The Video to iPod converter work will be done at the best converting speed, it full supports Intel Dual-Core Processor and AMD Dual-Core Processor which ensures full use of your CPU, support Multi-threading and batch conversion, provide >200% speed to convert video files to iPhone MP4 format beyond your imagination.

### **Automatic conversion**

Integrate the batch conversion, if you want to convert many files once, the program will convert input files one by one and turn off computer when done without your click.

### **Personalized film editing**

You can set the start time and end time for converting to change the length of the output iPhone MP4 file, and add overlay to your video files, if you are individual user, you can add text and image on your home DV for retaining memory , if you are web designer, you can also add text and image on your video for advertising.

### **Play back video before, in, and after conversion**

---

Play back video is supported, you can preview the input files before conversion, and through previewing you can decide the starting point and end point, in conversion you can decide whether you need stop converting, after conversion you can play back the output files to enjoy your masterpiece.

### **Auto File name creator**

If the output file already exists in the output directory, the program will rename to a new file name for output file avoid overwriting a existing file.

### **Flexible Setting**

Most functions can be called up with a simple mouse click , and the default setting of the application's parameters is the best possible performance. The default parameters work in most cases, but you can change them easily to best suit your needs.

### **Free Upgrades**

Registered users receive free upgrades and support for life.

### **System Requirement**

- Intel Pentium class 800 MHz processor or better; 512 MB RAM; 50 MB Hard Drive space;
