Movkit DVD to iPod Ripper is an outstanding DVD to iPod conversion software for the users who need to convert DVD to iPod video. With this software, you can back-up all popular formats, like DVD disk, VOB, IFO as iPod Video (including iPod 5, iPod Nano 3, iPod Classic, iPod Touch all Series) and Apple TV formats.

We have offered a large number of profiles in advance, corresponding to all products of the iPod series. Quite simply, there are only simple choices without any complex settings.

In addition to the explicit and simple interface, the software provides other functions such as language choice of subtitles and audio track, multi-angle DVD, and so on. There are also many advanced functions, like the visual adjustment of brightness, contrast, subtitle position, and volume; explicit picture cropping, and several flexible modes of split. All the settings will be reflected in the picture of preview directly.

Complete optimization: The software fully supports Intel Pentium D Dual-Core Processor and AMD Athlon 64 X 2 Dual-Core Processor

Main Functions

Easy to Use for iPod Video Processing

Easy Conversion from DVD to iPod Video MP4 and Apple TV with excellent output quality as well as extremely high speed.

Better iPod Compatibility
