**Movkit iPhone Video Converter** is the best iPhone converter software for all video files. It can quickly convert formats like AVI, RMVB, RM, MP4, WMV, MPEG, MKV, MOV, VOB, OGM, FLV to the iPhone Video or iPhone Audio with perfect sound quality.

Additionally, this video converter offers characteristic functions, like Magic preview, which make the software convenient to use.

### Main Functions

- Convert AVI, DivX, XviD and WMV to excellent-quality iPhone Video formats with high speed.
- Quickly back-up the formats, like MPEG, MPG, DAT and FLV as the iPhone MP4 with nice image and fine sound.
- Other popular video formats, such as MOV, QT, ASF, VOB, RMVB, RM, MP4, MKV, OGM and so on are also supported by this software.
- All the video formats mentioned above can be quickly converted to the sound-quality audio formats, (MP3, M4A, WAV) supported by iPhone.

### Key Features

- Offer explicit and simple interface, which makes the operation of this software quite easy.
- Batch files conversion provided to allow you to convert a number of files at one time!
- Variety of default iPhone video profiles such as high-quality, good-quality allow you to minimize the routine and do the job that requires hours in just a few minutes!
- Convert all popular video formats with two decoding modse

DirectShow Mode: Use DirectShow decoding for decompressing with installed codec on your operating system. Support external subtitles and MKV subtitles stream. It uses hardware codec decoding capability, high flexibility, and strong expansion.

Built-In Mode: Powerful built-in decoders to support dozens of formats decoder, rapid and steady, does not depend on Windows codecs, good compatibility.

- When you need to break off to run other CPU time-consuming programs, there is a

---

pause button to help you.

- Supports various kinds of video play modes. e.g. 16:9, 4:3, full screen.
- Magic Preview is available for the users to see the movie which will be played in the iPhone, before converting or during the process of conversion.
- The software provides Accurate Split Mode which can appoint a specific start and end position for users to get the desired segment of video.

### **System Requirement**

- Windows 2000/2003/XP and Windows Vista;
- 1000MHz Intel or AMD CPU, or above;
- 512 MB RAM or more;
- 100 MB free hard disk space.
