As a combination of Moyea Video to Apple TV Converter and Moyea Blu-Ray Ripper, it supports conversions from various popular video formats, DVD and Blu-Ray DVD to MP4, MP3, AAC etc. Not any other software is needed to assist converting protected DVDs and Blu-Ray DVDs. Moyea Apple TV Converter Ultimate can extract files directly from DVD and convert them in batch or merge multiple files into one. Meanwhile, due to its multi-thread and audio & video sync technology, you can convert video at a faster speed and output video with better quality, never need to worry about the audio and video sync issues.

Key Features

Import video files directly from protected DVDs and Blu-Ray DVDs

The converter could extract files directly from DVDs and Blu-Ray DVDs and place them in file list for converting and editing. A remarkable advantage of Moyea Apple TV Converter Ultimate is that it can directly convert protected DVDs and Blu-Ray DVDs without the assisting of any other software.

Convert different video formats to playback on Apple TV

As an all-in-one Apple TV converter, it converts video files, DVDs and Blu-Ray DVDs to proper video formats to play on your Apple TV. The software can convert all types of video files into MP4, MP3, AAC etc.

Support video output settings

The programs support video output settings including resolution, frame rate, codec, bit rate and audio output settings, including sample rate, channel, codec and bit rate, which allow you to get the most suitable videos you want.

Intuitive interface

Once you run any program of the Apple TV Converter Ultimate, you will see an intuitive interface, which will help you find any option you want without any problem, very easy-to-use and enjoyable.

Preview video before you convert

There is a video and DVD player embedded in main interface for you to preview original files and output results before converting. You can also snapshot and save favorite frame during previewing.

Various editing functions

It could perform editing of audio and video files. You could convert and output a specific time frame of video by trimming, and cut off unwanted area like black edge of the video by cropping. Also add text or image watermark to video is available. Besides you are allowed to

set special effects and replace the original audio with your favorite music.

Keep Original Aspect Ratio

You are allowed to specify the size of output video and keep its original aspect ratio. So the output video will not be stretched.

Excellent output quality

Because of the optimized audio and video sync technology, the program can help you to output excellent video quality for playback on your Apple TV and never let you be troubled by the audio and video sync issues.
