Moyea DVD to iPhone Converter is specially designed for people who want to edit and transfer the DVD movie or video to iPhone or iPhones 3GS and enjoy anywhere they like.

This iPhone converter can edit and convert DVD to MP4, MOV, MP3, WAV, M4V etc., which are widely used by iPhone, iPhone 3GS, or any other smart mobile devices, as well as editing them with trim, crop, watermark, audio replacement, effect and so on.

Key Features

Trim, crop DVD

After you select a specific DVD title or chapter, with Trim, you can get any video length you want. While with its Crop, you can cut off the DVD clips' black edges and unwanted area easily.

Add various watermarks

You can add various watermarks like logo, text, image (including GIF), and video watermark etc. to your original DVD clips before the conversion. The video watermark will add a picture-in-picture effect to the DVD.

Audio replacement

If you like, you can replace the original DVD clips' audio with other music or audio file for fun or any special use.

Special effects and deinterlacing

The program provides you the option to add special effects including simple gauss blur effect, simple laplacian sharpen, gray, flip color, invert, aged film and deinterlacing. What is worth mention is the deinterlacing, which can convert interlaced video into a non-interlaced form, so that you enjoy a better and clearer video effect.

Advanced audio and video sync technology

The program adopted advanced audio and video sync technology. With it, you can output files from your DVD with perfect quality, and never be troubled by the audio and video issues.

Faster DVD conversion speed

Its optimized multi-thread encoding technology allows you to convert DVD 1.5 even 2 times faster than other similar tools. That is to say, if you are using the 2 cores or multi-core CPU, the program will detect it at once and batch processes the DVD conversion with the multi-thread encoding technology, so as to save you lots of time.

Green codec environment

The programs' built-in codec provides you a green codec environment, because it will not install any codec to your computer, which may cause unexpected codec problem. The built-in codec can read all the video and audio info and play it normally to meet your need.
