Moyea PPT to DVD Burner Lite is another great program to burn PowerPoint to DVD and convert PowerPoint to video with high quality. Different from the Pro edition, this PPT2DVD Lite provides a simpler alternative to the creation of PowerPoint DVDs and videos.

By burning PowerPoint to DVD, it gives your presentation more of a TV feel on a home DVD player and makes it easy to distribute a presentation to friends, clients and colleagues. By converting PowerPoint to video (e.g. PowerPoint to AVI, MPEG, FLV, 3GP, MP4, VOB, WMV, MOV, etc.), it empowers you to view a full-play PowerPoint slideshow on video hosting websites like YouTube and many portables like iPhone, iPod, PSP, Zune and cell phones.

Key Features

One Slide One Chapter

In order to extract some unnecessary repeat when viewing PowerPoint on DVD player or Portable devices, this program enables the mode of "One Slide One Chapter". In other words, if there are many animations in a certain slide, the program would automatically retain the first animation in the certain slide for the output. Then with this way, audience can watch the converted DVD or video file much more comfortably.

A distinct User Interface with easy run

Unlike Moyea PPT to DVD Burner Pro version, this PPT2DVD Lite version designs a Wizard operation interface, which can give users a feeling of finding something new and fresh. The most significant in this Wizard interface is to let beginners and greeners easily run and enjoy the PowerPoint to DVD or video conversion without complicated program knowledge.

Novice Customizable Version

This Moyea PPT to DVD Burner Lite version is designed for beginners and novices with Wizard operation interface. Besides, all the operation descriptions are described in simple and understandable language, for example, you can directly choose High Quality, Normal Quality, or Low Quality for the output instead of getting the output effects via setting video & audio parameters. Thus beginners and novice can easily and precisely convert PowerPoint to DVD or video file without any questions.

Multiple Inputs and Multiple Outputs

This PowerPoint conversion tool support convert all types of PowerPoint file including PPT, PPTX, PPS, POT, etc. Meanwhile, this Presentation tool also allows export multi-types of output files; they are DVD, HD-DVD, and Video file in all fashionable formats like AVI, WMV, MOV, MP4, FLV, MPEG, 3GP, 3G2, DV, etc.

Background Music & Image function

This PPT2DVD burner not only can fully retain the original audio file in the PowerPoint file for the output, but also can set to ignore the original ones to import any numbers of music files to the program for the output file. Meanwhile if you like, you could import necessary images or logo during the conversion to comply with different content.

Customize DVD Menu for Easier Playback with Remote Control

The program provides a template of DVD menus for convenient authoring during the conversion. The unique theme menu incorporates versatile subjects like wedding, birthday party, reunion, meeting, business promotion, etc, to help you create splendid DVD or video for different occasions. Besides, the list view and thumbnail view generated in the menu is clear clue to navigate your audience.

Optimized Encoding with Flexible Output Settings

Before conversion, you are allowed to configure the parameters to adjust settings such as compressing rate, video quality, norm, video aspect ratio, etc to make the converted video and DVD suitable for different terminal devices. The film frame rate has been increased for smoother motions in the output files.

Better DVD Output Quality & Compatibility of PAL & NTSC TV standards

High quality encoding mode has been configured and the performance of the output in DVD and video formats has been greatly improved, especially the definition of the DVD menu. Besides the high-quality output, the program makes it possible for you to choose the proper TV and DVD standards to suit your particular location.

Perfect Synchronization and Fully Retain the original elements

This program realizes the perfect synchronization of the sound and animation both in burned DVD and converted video, and offers the solution to the problem of the asynchronization of sound and animation which had remained a hard nut for many years. On the base of perfect audio and video synchronization, this PowerPoint to DVD Burner also can fully retain the original elements including audio files, video & movie clips, transition time, etc. for conversion to the output file.

Fast Conversion Speed

Under the extremely User-friendly interface and advanced technology, this PowerPoint to video and DVD program can help you create a wonderful DVD and video from your presentation slideshows in a short time.

Batch Process Conversion Supported

Up to 12 presentations can be imported and processed at a time which will avoid you a mountain of repeat setting troubles. This feature has escalated itself ranking in the rare top conversion-speed products.

Built-in Burning Engine & High Compatibility

With an embedded burning engine, users can burn their DVD file to DVD discs smoothly without referring to a third party program. With high compatibility of the program, it could be run on computers with low hardware configurations and almost all versions of Microsoft Windows operating systems from Windows 2000 are OK.
