It is an all-in-one program for your 3G cell phones. With it, you can edit and convert almost all video, audio and image files to 3GP or 3G2, as well as other common video and audio like TiVo, MOV, M4V, MP4, MKV, DivX AVI, YouTube Video FLV, WMV, MP3, FLAC, MKA, OGG, WAV, AC3, M4A and so on.

After the customization and conversion, you can enjoy various video, audio and image files on your 3G mobile phones like Motorola ROKR E6, Sony Ericsson 3GP series, LG 3GP series, BlackBerry, Gphone and other more freely.

Key Features

Trim, crop and merge

The trim function allows you to get a specific length of video accurately since its inner seek function can capture any key frame of video, while with crop, you can cut off the black edges and unwanted video area easily. In addition, if you like, check the option "Merge into one file" on the main interface? you can merge several videos into one bigger file for conversion.

Add text, image, and video watermark

With its watermark function, you can add text watermark, image (including GIF) watermark, or video watermark to your original video for conversion. What is worth mentioning is that its video watermark function will add a picture-in-picture effect on your video.

Special effect

If you like, you can set the original video's effect by adjusting the original video's brightness, contrast, saturation, as well as adding other special effect like simple gauss blur (remove image noise), simple laplacian sharpen (sharpen the color), aged film (make old yellow effect), flip color, Invert, etc. to the original video files. In addition, you can also flip the video vertically and horizontally.

Audio replacement

The program allows you to replace the original audio with other music or sounds you like to meet your special need.

Advanced audio and video sync technology

Because of the audio and video sync technology, you can output 3G videos supported by 3G mobile phones with better video quality and never let you be troubled by the audio and video sync issues.

Faster conversion speed

The program adopted multi-thread encoding technology, which makes the conversion speed

faster than ever. That is to say, it is estimated that you can save at least half time to convert a video with the same size.

Built-in codec

Since the 3GP converter has its own built-in codec, so it will not install any other codec on your computer, which can avoid the unexpected codec problem.
