Moyea Video to iPod Converter is an excellent tool for you to edit and convert a range of video, audio and image files like TiVo, FLV, F4V, AVI, WMV, MKV, MOV, MTS, M2TS, MOD, AAC, AC3, JPG etc, to MP4, MOV, MP3, WAV and M4A for playback on your iPod, such as iPod Shuffle, iPod Nano, iPod Classic, iPod Touch. With this program, people who have DVs or camcorders manufactured by JVC, Panasonic, Canon, Sony, etc.), DVDs (*.vob, *.mts, *.m2ts, etc.), YouTube (*.flv, *.f4v), etc. can now all enjoy the various videos with your iPod on the go.

At the same time, the program highlights with 1.5 or 2 times faster conversion speed, better output quality without video and audio sync problems and powerful editing options.

Key Features

User friendly interface
The user-friendly interface allows people to find every option without any problems.

Merge and add watermark
To merge several videos into one bigger file for conversion, just check the option "Merge into one file" on the main interface. Meanwhile, you can also add text watermark, image watermark, or video watermark to your original video to personalize it.

Trim and crop
You will be excited to find the program's powerful editing options: trim, crop, merge, and watermark. You can get a specific length of video accurately with Trim; cut off the black edges and unwanted video area easily with Crop.

Audio replacement
Enable the audio replacement function, you can replace the original audio with other music or sounds you like to meet your special need.

Faster conversion speed
Its multi-thread encoding technology makes the conversion speed 1.5 or 2 times faster than the similar tool. Therefore, you are expected to save at least half time to convert a video file with the same size.

Better output video quality without audio and video sync problem
The program adopted advanced audio and video sync technology, which helps you get better output video quality for your iPod and never be troubled by the audio and video sync problem.

Built-in codec

This program has its own built-in codec. So it will not install any other codec on your computer, which can avoid the unexpected codec problem.
