It can edit and convert common videos (.*tivo,.*wmv,.*avi,.*mkv, etc) tapeless videos (*.tod, *.mod) from DVs or camcorders manufactured by JVC, Panasonic, Canon, Sony, etc., DVD videos (*.vob, *.mts, *.m2ts, etc.), YouTube videos (*.flv, *.f4v), etc. for playback on your Zune.

It can convert audio files (*.au, *.mp3, *.mp2, *.flac, *.ape, *.ogg, *.8svx, *.aiff,*.aif, *.caf, *.dts, *.smv, *.tta, *.voc) to be enjoyed on your Zune.

It can also convert your image files ((*.jpg, *.ico, *.bmp, *.png, *.gif, *.tiff) for enjoyment on your Zune.

Key Features

User friendly interface
The user-friendly interface allows people to find every option without any problem.

Faster conversion speed
Its multi-thread encoding technology makes the conversion speed 1.5 or 2 times faster than the similar tool. Therefore, you are expected to save at least half time to convert a video file with the same size.

Powerful editing functionalities
You will be excited to find the program's powerful editing options: trim, crop, merge, and watermark. You can get a specific length of video accurately with Trim; cut off the black edges and unwanted video area easily with Crop; merge several videos into one bigger file for conversion by checking the option "Merge into one file" on the main interface, as well as adding text watermark, image watermark, or video watermark to your original video to personalize it.

Better output video quality without audio and video sync problem
The program adopted advanced audio and video sync technology, which helps you get better output video quality for your Zune and never be troubled by the audio and video sync problem.

Built-in codec
This program has its own built-in codec. So it will not install any other codec on your computer, which can avoid the unexpected codec problem.

Audio replacement
Enable the audio replacement function, you can replace the original audio with other music or

sounds you like to meet your special need.
