Key Features

Audio to DVD

All Audio files could be burned on DVD discs with our Music DVD Creator, including WAV, AIFF, AU, SND, MIDI, WMA, MP3, MP2, MP1, MPA, M2P, M2A, etc. for organizing all your separated music into one DVD disc.

Video to audio

Music DVD creator can convert most popular video such as AVI, MPEG, MPG, M1V, DAT, MPA, MPE, MPV2, WMV, ASF, ASX, DV, DV1 VOB, M2V, IVF, MOV, QT, RM, RMVB, DivX into audio directly.

Rip CD tracks

You transfer all your CD collections into DVD disc. This Music DVD Creator can rip all CD tracks as audio saved on DVD.

Recorded audio to DVD

Music DVD Creator allows you to burn all recorded files with Microphone or Line In Device on DVD. You can easily create your own voice DVD with it.

Add images as background

Music DVD Creator enables you to add your photos or your favorite images in DVD as background. Thus you can have fun both on visual and hearing aspect.

Add lyrics as subtitle

You can also add the lyrics to DVD for your desired songs. The added lyric will be displayed as subtitle. So you would not miss out any beautiful lyric.

PAL & NTSC supported

The music DVDs created with Music DVD Creator have no PAL and NTSC standard limit any more. No matter which standard player you have, you can playback the created music DVD smoothly.

Mutiple audio output mode

Freely select audio output mode. You can specify either 48KHz or 96KHz as the DVD audio output rate in this way you would have a difference hearing experience on the audio DVD.

Display mode & aspect ratio

Supporting Letter Box and Pan & Scan display mode; Supporting 4:3 and 16:9 aspect ratio. With this display feature, you can enjoy your own DVD music both on your PC and standalone DVD player.

High compatibility

Music DVD creator supports all popular DVD media (DVD+R, DVD-R, DVD+/-R, DVD-5, DVD-9) and dual-layer DVD-9 burner, create burned DVD disc playable on PC & home DVD player.
