Why choose Pavtube Blu-ray to iPad Converter?

- Rip Blu-Ray movies/DVDs from disc, folder and IFO/ISO image file
- Powerful BD decryption capability
- Apple devices compatibility
- Advanced audio and video in sync technology
- Recognize all subtitles and audio tracks in a Blu-ray/DVD movie
- Backup/copy Blu-ray and DVD movies to hard drive with original structures
- Preview and take snapshots
- Trim and crop DVD/Blu-Ray clips

Pavtube Blu-ray to iPad Converter (also known as Blu-ray to iPad 2 Converter) aims to help users rip/compress Blu-ray and DVD movies to iPad and iPad 2 playable file formats, including H.264(*.mp4) and MPEG-4 (*.mp4). More than that, the Blu-ray to iPad 2 Converter also offers optimized format presets for other popular Apple devices, like Apple TV, iPhone, and iPod. With powerful BD decryption capability, the BD to iPad Converter is able to read retail Blu-ray discs released in different regions, as well as removing AACs and BD+ encryptions from latest Blu-ray movies.

Key Features

- Pavtube Blu-ray to iPad/iPad 2 Converter not only can rip commercial BDs directly from Blu-ray Disc, Blu-ray ISO file, and Blu-ray Folder, but also can rip commercial DVDs from DVD disc, DVD Folder, DVD IFO File, and DVD ISO Image File.
- With advanced BD decryption capability, the Pavtube Blu-ray to iPad Converter is capable of reading commercial Blu-ray discs released in different regions, as well as removing AACs and BD+ encryptions from latest Blu-ray movies.
- Pavtube Blu-ray to iPad 2 Converter is capable of ripping Blu-ray/DVD movies for playback on nearly all popular Apple devices, like iPad, iPad 2, Apple TV, ATV 2, iPhone, iPhone 3G, iPhone 4, iPod nano, iPod classic, iPod touch 4, etc.
- The Blu-ray to iPad 2 Converter adopts advanced audio and video in sync technology to ensure audio and video matching very well.
- The Blu-ray to iPad conversion tool is capable of reading all subtitles and audio tracks in a Blu-ray/DVD movie, including Dolby TrueHD Audio and DTS-HD Master Audio. And users are able to select their wanted audio and subs to be burnt into the output video at will.
- When you use "Full Disc Copy" to access your source movie, Pavtube Blu-ray to iPad 2 Converter will get rid of the copy protections embedded in your Blu-rays/DVDs immediately, and meanwhile copy the movies to your hard drive with the original structures of your Blu-rays or DVDs at super fast speed.

-
- A preview window is inlaid for you to preview and take snapshots of the source movie before converting.
 - Trim function allows you to select your wanted movie scenes to rip or convert at will. Crop function enables you to cut off the black bars and unwanted area of the source movie easily.
 - The program allows users saving their usually used profile as customized profile. In that way, users needn't adjust audio and video settings when using the program each time.
 - Another amazing feature of Pavtube Blu-ray to iPad Converter is allowing users to customize the final output file quality by adjusting video and audio settings, including video codec, aspect ratio, frame rate, bit rate, audio codec, sample rate, and audio channel.
 - Pavtube BD to iPad 2 Converter supports adding different watermarks to the output videos, including text watermark, image (including GIF) watermark, and video watermark, which enables you to experience the picture-in-picture effect in a better way.
 - Once you tick off the checkbox "Shut down computer after conversion", the program will shut down the computer automatically when the conversion process is completed.
