Why choose Pavtube Blu-ray to iPhone Converter?

- Rip BD/DVD to H.264 and MPEG-4 encoded mp4 format for iPhone/iPhone 4.
- Have optimum format presets for iPad/iPad 2, Apple TV/ATV 2, and iPod.
- Select wanted audio track and subs track to be kept in the output files.
- Keep original file structure of BD/DVD movie by using “Full disc Copy” function.

Pavtube Blu-ray to iPhone Converter(aka Blu-ray to iPhone 4 Converter) is good at processing Blu-ray/DVD to iPhone conversion, which comes with full DVD and Blu-ray support, including decrypting standard DVD (CSS copy protection) and commercial Blu-ray (BD+ and AACS encrypted) movies. The output files are not only compatible with iPhone/iPhone 4, but also compatible with other Apple devices, like Apple TV, iPad, iPad 2, iPhone, iPhone 3G, iPod nano, iPod classic, and iPod touch 4.

Key Features

- Pavtube Blu-ray to iPhone/iPhone 4 Converter not only can rip commercial BDs directly from Blu-ray Disc, Blu-ray ISO file and Blu-ray Folder, but also can rip commercial DVDs from DVD disc, DVD Folder, DVD IFO File, and DVD ISO Image File.
- The video to iPhone converter software adopts optimized audio and video in sync technology, which will never let you encounter any troubles caused by audio and video out of sync issues.
- This Blu-ray to iPhone converter software takes full advantage of the latest NVIDIA CUDA technology to largely accelerate decoding/encoding speed. The GPU acceleration saves users time when converting videos to another format by using H.264 codec.
- With advanced BD decryption capability, the Pavtube Blu-ray to iPhone Converter is capable of reading commercial Blu-ray discs released in different regions, as well as removing AACS and BD+ encryptions from latest Blu-ray movies.
- Pavtube Blu-ray to iPhone 4 Converter is capable of ripping Blu-ray/DVD movies for playback on nearly all popular Apple devices, like iPhone, iPhone 3G, iPhone 4, iPad, iPad 2, Apple TV, ATV 2, iPod nano, iPod classic, iPod touch 4, etc.
- The Blu-ray to iPhone conversion tool is capable of reading all subtitles and audio tracks in a Blu-ray/DVD movie, including Dolby TrueHD Audio and DTS-HD Master Audio. And users are able to select their wanted audio and subs track to be burnt into the output video at will.
- When you use “Full Disc Copy” to access your source movie, Pavtube Blu-ray to iPhone 4 Converter will get rid of the copy protections embedded in your Blu-rays/DVDs immediately, and meanwhile copy the movies to your hard drive with the

original structures of your Blu-rays or DVDs at super fast speed.

- A preview window is inlaid for you to preview and take snapshots of the source movie before converting.
- Trim function allows you to select your wanted movie scenes to rip or convert at will. Crop function enables you to cut off the black bars and unwanted area of the source movie easily.
- The program allows users saving their usually used profile as customized profile. In that way, users needn't adjust audio and video settings when using the program at the next time.
- Another amazing feature of Pavtube Blu-ray to iPhone Converter is allowing users to customize the final output file quality by adjusting video and audio settings, including video codec, aspect ratio, frame rate, bitrate, audio codec, sample rate, and audio channel.
- Pavtube BD to iPhone 4 Converter supports adding different watermarks to the output videos, including text watermark, image (including GIF) watermark, and video watermark, which enables you to experience the picture-in-picture effect in a better way.
- Once you tick off the checkbox "Shut down computer after conversion", the program will shut down the computer automatically when the conversion process is completed.
