Pavtube DVD to iPhone Converter enables you to edit and convert DVDs to iPhone or iPhone 3GS supported files for playback anywhere.

It supports to import any DVDs and for customization and conversion, then output MP4, MOV, MP3, WAV, M4V etc., which can be used on iPhone, iPhone 3GS, or any other portable devices. After the conversion, you are expected to enjoy a wider multimedia world with your iPhone.

Key Features

Easy-to-use interface

Because of its easy-to-use and intuitive interface, you will have no problems to find the options.

Faster conversion speed

Its optimized technology allows you to enjoy a faster DVD conversion. You are expected to convert DVD 1.5 even 2 times faster than other similar tools.

Advanced audio and video sync technology

The program adopted advanced audio and video sync technology; never let you troubled by the audio and video issues.

Built-in codec

Its built-in codec will not install any codec on your computer, so as to avoid the unexpected codec problem.

Trim DVD clips for iPhone

You can get any video length you want with Trim function, just drag the process bar to the trim points.

Crop DVD clips for iPhone

With Crop, you can cut off the DVD clips' black edges and unwanted area easily.

Various watermarks

You can add various watermarks like text, image (including GIF), and video watermark etc. The video watermark will give you a picture-in-picture effect.

Do deinterlacing

The program supports deinterlacing, which can convert interlaced video into a non-interlaced form, so that you enjoy a better and clearer video effect. Besides, it also allow you to add

special effects like simple gauss blur effect, simple laplacian sharpen, gray, flip color, invert, aged film.

Capture the snapshot images

The program supports to capture the snapshots images to be used as wallpaper or editing elements.

Real-time preview

If you need, you can make changes for the original DVD clips subtitles, audio track and angle when doing real-time previewing on the right window.
