Pavtube DVD to iPod Converter for Mac is a good tool for iPod owners to enjoy DVDs on the go with iPod. It supports to convert DVD to almost all other popular video and audio formats including MP4, MOV, M4V, MP3, M4A, and WAV. Especially its powerful customization functionalities, stable and faster conversion speed will bring you a pleasure experience.

With it, you can :

- Trim, crop DVD videos.
- Replace the original DVD audio.
- Merge multiple DVD clips into one for conversion.
- Add special effects and different watermarks when you need.
- Import converted DVD to iTunes and sync to iPod for enjoyment anywhere you like.
- Backup the DVD items with other formats for further use if you like.

Main Features

Two-in-one iPod solution
It is a two-in-one iPod solution: a powerful iPod editor and a faster iPod editor.

Easy-to-use interface
It will be a pleasure to use the program, since you will have no problems to find every option with its interface.

Faster conversion speed
Its optimized technology allows you to enjoy a faster DVD conversion. You are expected to convert DVD 1.5 or 2 times faster than other similar tools.

Trim and crop DVD clips
You can get any video length you want with trim function, just drag the process bar to the trim points. While with crop, you can cut off the DVD clips' black edges and unwanted area easily.

Various watermark and special effects
You can add various watermarks like text, image (including GIF), video watermark etc. as well as special effects including simple gauss blur effect, simple laplacian sharpen, gray, flip color, invert, aged film and deinterlacing. What is worth mention is the deinterlacing, which can convert interlaced video into a non-interlaced form, so that you enjoy a better and clearer video effect.

Snapshots images

The program supports to capture the snapshots images to be used as wallpaper or editing elements.

Support a set of real-time change options for the DVD clips subtitles, audio track, and angle when previewing.
If you need, you can do real-time changes for the original DVD clips subtitles, audio track and angle when previewing on the right window.

Advanced audio and video sync technology
The program adopted advanced audio and video sync technology; never let you troubled by the audio and video issues.

Built-in codec
Its built-in codec will not install any codec on your computer, so as to put an end to the unexpected codec problem.
