Pavtube HD Video Converter for Mac is designed for converting HD videos from HD camcorders or DVs (like JVC, Panasonic, Sony and Cannon), non-protected HD or Blu-ray movies, DVR files (*.tivo) to other file types for playback on popular media devices like Apple TV, PS3, Xobox, Xobox360, WD TV HD Player, PSP, iPod, iPad, iPhone (including iPhone 4), iPhone 3G cell phones, BlackBerry, Android smart phones (Motorola Droid, HTC Incredible, HTC Desire Z, Desire HD, Samsung i9000), Creative Zen, iriver, Zune, etc. as well as for editing in iMovie, Final Cut Express, Final Cut Pro, Avid, Adobe Premiere, etc.

- Convert, edit, or compress videos from HD DVDs or camcorders.
- **New!**Support Apple ProRes/DVCPRO/HDV/Avid DNxHD/AIC encoding.
- Deinterlace and reduce image noise to keep better quality.
- Trim, merge video, or watermark to edit video.
- Support VFW codec encoding and 5.1 channel audio output.

Key Features

Comprehensive editing function

You can trim the video to be a certain length and crop the video to set the size of the screen as well as set the effect by changing brightness, contrast, saturation, volume of the video. Choose the specific effect model from Simple gauss blur, Simple laplacian sharpen, Aged film, Flip color, Invert and None. In addition, you can horizontally and vertically reverse the picture.

Manifold Mobile players

Pavtube HD Video Converter for Mac supports almost all portable players like iPod, iPhone, iPhone 3G, Apple TV, PSP, BlackBerry, Creative Zen, iriver, Zune, etc.

Deinterlacing to get better video quality

This program can remove interlace on videos from Interlaced scanning cameras, Interlaced DVs, or DVDs.

Watermark the video with company logo, text, or video

This fantastic program provides unique watermark adding and editing function. You can add and edit not only text and image watermark, but also add video watermark to create "Picture-in-picture (PiP)" effect. VP6 alpha video watermark is also supported.

Perfect Audio Video sync

With the AV-sync conversion technology, you won't get the out-of-sync problem with this program.

Capture attractive images

With this program, you can capture any part of the video as snapshot. The images can be found in snapshot folder.

Merge multiple videos

Check the option Merge into one file on the main interface to merge the several videos into one file, if you want to convert multiple videos without any interruption.

System Requirements

- 1G Hz or above PowerPC G4/G5 or Intel processor.
- Mac OS X (including Mac OS X 10.5 Leopard and 10.6 Snow Leopard) on iMac, MacBook, Mac Pro, MacBook Air, MacBook Pro, etc.
- 512 MB physical RAM (memory) or more.
- 1024*768 or higher resolution display.
