Newest audio and video sync technology

This program adopted advanced audio and video sync technology; never let you troubled by the audio and video issues.

Replace the audio track

You can replace the original audio with other music or sounds you like to meet your special need.

Capture beautiful still images

This program supports to capture the snapshots images, which can be used as wallpaper or editing elements.

Different watermarks

The program supports to add different watermark like text, image (including GIF), and video watermark. Its video watermark function will add a picture-in-picture effect to your video.

Built-in codec

Its built-in codec will not install codec to your computer, so as to avoid the unexpected codec problem.

Faster conversion speed

Its multi-thread encoding technology makes the conversion speed 1.5 or 2 times faster than the similar tool. Therefore, you are expected to save at least half time to convert a video file with the same size.

System Requirements

- Windows NT4.0 + SP6/2000/XP/Vista
- Memory: 64MB at least
- 512MB hard disc space or above
