Pavtube MOD Converter is an ideal tool for people who are using digital camcorders, such as JVC Everio, the Canon FS100 and the Panasonic D-Snap SD-card camcorders. It can edit and convert the recording video MOD from your digital camcorder to other popular video and audio formats like MP4, 3GP, AVI, MPG, MPEG-4, FLV, MOV, 3G2, VOB, MP3, FLAC, MKA, OGG, WAV, AC3, M4A etc. for playback on portable devices like iPod, iPhone, iPad, PSP, Zune, Creative Zen, cell phones and edit in Adobe Premiere, Sony Vegas, Power Director etc.

Key Features

Easy to use

The program's intuitive interface provides you the easy to understand options, with which you can use the MOD convert as an expert.

Faster conversion speed

Its optimized multi-thread technology allows you to convert MOD in a faster way, saving you nearly half time.

Simple gauss blur effect

Simple gauss blur effect is very useful to recorded file formats, since it can eliminate the recorded videos noise. If you like, you can also add other special effects including simple laplacian sharpen, gray, flip color, invert, aged film and deinterlacing. What is worth mention is the deinterlacing, which can convert interlaced video into a non-interlaced form, so that you can enjoy a better and clearer video effect.

Audio and video sync technology

The program adopted advanced audio and video sync technology, which helps to output video with high quality, never let you troubled by the audio and video issues.

Built-in codec

Its built-in codec will not install any codec on your computer, so as to avoid the unexpected codec problem.

Accurate trim function

The trim function allows you to get a specific length of MOD video accurately since its inner seek function can capture any key frame of the MOD.

Crop MOD clips

You can cut off the black edges and unwanted MOD video area easily with its crop function, so as to enjoy wider screen on the portable devices.

Add text, image, and video watermark

This program supports to add different watermark types, including text, image (including GIF), and video watermark to the MOD. With its video watermark function, you can add a picture-in-picture effect to your video.

Merge multiple videos and replace original audio

You can join multiple videos into one bigger file for conversion, as well as replace the original audio with other sounds you like.
