Pavtube MTS/M2TS Converter is designed for those who have an AVCHD camcorder but unfortunately get stuck in MTS and M2TS video format. It does a good job in converting MTS, M2TS, M2T, TS, TP and TRP to versatile video and audio formats. People who have no way to edit MTS/ M2TS files with Adobe Premiere, Avid, Sony Vegas Cyberlink Power Director, Avid, Magix Movie Edit Pro, Windows Movie Maker, etc can find a best solution by converting them to useable formats such as WMV(VC-1), MOV (AVC) and MPEG2. The output formats covers common audio, SD video, HD video, Flash video, DVD as well as customized formats for Xbox, Apple TV, PS3, WDTV HD Player, iPod, iPhone, iPad, PSP, Zune, Creative Zen, Archos, Nokia etc. All these output formats enable you to playback, edit and upload the footages shot by Sony, Canon, JVC and Panasonic AVCHD Camcorders.

Key Features

Trim and crop video

The trim function allows you to get a specific length of video accurately since its inner seek function can capture any key frame of video, while with crop, you can cut off the black edges and unwanted video area easily.

Merge multiple videos and replace original audio

You can join multiple videos into one bigger file for conversion, as well as replacing the original audio with other music or sounds you like.

Add text, image, and video watermark

Its watermark function allows you to add different watermark types, including text, image (including GIF), and video watermark. Its video watermark function will add a picture-in-picture effect on your video.

Capture the snapshot images

You can capture the snapshots images as your wallpaper or editing elements if you like.

Optimized audio and video sync technology

The program adopted optimized audio and video sync technology, so as to output video with high quality and never let you be troubled by the audio and video sync issues.

Faster conversion speed

The built-in multi-thread encoding technology makes the conversion speed faster than ever. It is estimated that you can save at least half time to convert a video with the same size.

Built-in codec

Its built-in codec will not install any codec on your computer, so as to avoid the unexpected

codec problem.
