Audio and video sync technology

Its advanced audio and video sync technology will let you enjoy DVD on PSP without any audio and video issues.

Faster conversion speed

The program optimized its conversion speed with multi-thread technology, so that you can convert the DVD 1.5 or 2 times faster than other similar programs.

Real-time preview

You can have a real-time previewing on the right window of the main interface before conversion.

Trim and crop DVD/Video

Trim function allows you to get specific video duration, just drag the process bar to the trim points. Meanwhile, with crop function, you can cut off the black edges and unwanted area of the video easily.

Various watermarks editing

The program supports to add different watermarks to your video like text watermark, image (including GIF) watermark, and video watermark. Its video watermark function will create a Picture-in-picture effect to your video.

Built-in codec

Its built-in codec will not install codec to your computer, so as to avoid the unexpected codec problem.
