Pavtube Video Converter enables you to edit and convert videos among almost all video and audio formats, as well as the animated GIFs.

With it, videos from DVs or camcorders (*.mod, *.tod, *.mts shot with JVC, Panasonic, Cannon, Sony cam etc.), TiVo (*.tivo), DVDs (*.vob, *.mts, *.m2ts, etc.), YouTube (*.flv, *.f4v), etc. can be converted to files supported by popular portable devices like iPod, iPhone, iPad, PSP, Zune, Creative Zen, 3G phones, Xbox, Apple TV, WD TV and so on.

In addition, the output videos can also be imported to Adobe Premiere, Sony Vegas for further editing; be inserted to PPT for presentation; or even be uploaded to YouTube for sharing.

Key Features

Intuitive interface

With its easy-to-use intuitive interface, you can easily find any options you need to edit and convert the videos to the format you want.

Optimized audio and video sync technology

The program adopted optimized audio and video sync technology, so as to output video with high quality and never let you troubled by the audio and video sync issues.

Faster conversion speed

The built-in multi-thread encoding technology makes the conversion speed faster than ever. It is estimated that you can save half time to convert a video with the same size.

Deinterlacing

The deinterlacing option allows you to convert interlaced video into a non-interlaced form, so that you can enjoy a better and clearer video effect. Apart from that, the program provides other video effects like simple laplacian sharpen, gray, flip color, invert, aged film etc.

Trim and crop video

The trim function allows you to get a specific length of video accurately since its inner seek function can capture any key frame of video, while with crop, you can cut off the black edges and unwanted video area easily.

Merge multiple videos and replace original audio

You can join multiple videos into one bigger file for conversion, as well as replace the original audio with other music or sounds you like.

Add text, image, and video watermark

Its watermark function allows you to add different watermark types, including text, image (including GIF), and video watermark. Its video watermark function will add a picture-in-picture effect on your video.

Capture the snapshot images

You can capture the snapshots images as your wallpaper or editing elements if you like.

Customize profile list and format

The upgraded program allows you to arrange the profile list as you like. Hide the unwanted formats profile list and save customized format to Custom group for ease of use.

Support various devices including TiVo DVR and iPad.

TiVo (*.tivo) files imported from TiVo DVR can be converted to various portable players and mpeg and vob format for burning. Flashes and other videos can be converted to optimized mp4 files for playback with iPad.
