Pavtube Video to Apple TV Converter is a powerful tool for you to edit and convert HD video from camcorders like JVC, Panasonic and Canon, as well as FLV and F4V videos from YouTube, Metacafe, Dailymotion, audio and images files to formats that supported by Apple TV. Besides, it also accepts TiVo as input file.

What's more, its edit functionalities allows you to trim, crop videos, merge multiple videos into one, replace original audio, add text, image (including GIF), video watermark; adjust video effects, and other more.

Go and use it, you can make more out of your Apple TV.

Key Features

Powerful editing functionalities

The program supports powerful editing options like trim, crop, merge, and watermark. You can get a specific length of video accurately with Trim; cut off the black edges and unwanted video area easily with Crop; merge several videos into one bigger file for conversion by checking the option "Merge into one file" on the main interface, as well as adding text watermark, image watermark, or video watermark to your original video to personalize it.

Audio replacement

Enable the audio replacement function, you can replace the original audio with other music or sounds you like to meet your special need.

Advanced audio and video sync technology

Because of the audio and video sync technology, you can output videos supported by Apple TV with better video quality and never let you be troubled by the audio and video sync issues.

Faster conversion speed

The program adopted multi-thread encoding technology, which makes the conversion speed faster than ever. That is to say, it is estimated that you can save at least half time to convert a video with the same size.

Built-in codec

Since this program has its own built-in codec, so it will not install any other codec on your computer, which can avoid the unexpected codec problem.

Support TiVo

Support TiVo (*.tivo) video files from your TiVo Desktop.
