Plato Screen Video Recorder - is a video screen capture, screen recording tool used for recording screen activity into standard AVI video files. If you move the cursor, launch a new program, type some text, click a few buttons, or select some menus -- anything that you see on your screen – Plato Screen Recorder Free will be able to record all these and even the sound.

You can also use Plato Screen Video Recorder to develop videos to demonstrate features of a new software, for creating movies used in user training, for tracking the progress of a program that executes for a long time, or for recording the sequence of steps that cause the occurrence of bugs in faulty software. You can also speak into the microphone while recording is in progress to include audio with the recorded video.

Key Features

- supports system-wide hotkeys to start, pause, stop screen recording.

- Easy precision visual screen area or window selection.
