SocuSoft DV to DVD Converter is a very practical DVD authoring application. Within only a few steps, it can burn video clips taken by your camcorder or video files saved on your PC to CD or DVD disc with very high output quality and at very fast speed.

This DV to DVD Converter offers very powerful video editing and DVD burning functions. It allows you to combine video files into video slideshow, complete with different styles of transition effect and exquisite DVD menu templates. You can also trim the video length, add background music, edit DVD menu theme and menu item and so on.

The Converter supports lots of video formats. You can capture the video from your camcorder and burn it to CD or DVD disc, or burn AVI to DVD, MOV to DVD, WMV to DVD, ASF to DVD, RM to DVD, RMVB to DVD within only a few clicks. You can choose to output the video to DVD or SVCD for playback on all popular home DVD players. You can also choose to create disc image file, edit disc label and select the PAL or NTSC TV system according where you are living.

If you want to keep your homemade video clips or videos downloaded from the Internet to CD or DVD disc for backup, enhancement and enjoyment, SocuSoft DV to DVD Converter offers the most convenient way to create your own DVD movies.
