**DVD Photo Slideshow** is a powerful application for creating the slide show of photos and videos to be presented online or watched on TV and portable devices.

The program integrates powerful components and tools such as Audio CD Ripper, Sound Recorder, DVD/VCD Burning component, Web Album Creation component and Movie Generator. It features over three hundred transition effects, various album themes and templates as well as powerful parameter settings for album photos and background music. The customizable parameters of transition effects are used to control the duration of transition, photo, slide show and audio and the background color. The customizable parameters of album themes are provided to design fashionable creative slide show. As for the mode of album photos, settings of pan & zoom, text, art clips, subtitle and process such as contrast and color balance are provided. In the scene of background music, there are a couple of useful shortcut buttons such as add, delete, trim, play, rip and record, which enable you to edit audio more efficiently.

With its powerful function, DVD Photo Slideshow enables you to generate the amazing photo slide show easily by adding photos, videos, subtitles, background music and so on. The program provides three simple steps to create a slide show. They are "Organize Photos", "Choose Menu" and "Burn Disc". In the third step, it provides different ways of creation such as DVD/VCD burning, web album creation or movie generation. You can burn a slide show DVD/VCD/SVCD to be watched on TV. You can also publish the slide show on your blog or website. You can even generate the slide show in different video formats such as FLV movie to be uploaded to MySpace, YouTube and other websites, or MPEG-4, MPEG and 3GP to be played on your mobile phone, iPod, PSP and so on.

### **Key Features**

#### **No Experience Necessary**

DVD Photo Slideshow is simply the easiest to use slideshow software. It is designed to be easy enough for anyone in the family to use. You can create dynamic slideshows in just three steps : Add your photos, design your movie menu, and burn your disc. You will find that you can perform all tasks in the most natural and intuitive way.

#### **More Output Formats than Other Slideshow Software**

DVD Photo Slideshow gives you more output options than any other slide show software. Create photo video CD or DVD that play back on your TV with DVD player. Generate MPEG video files for PC viewing. Generate MPEG-4 format files for mobile devices such as Apple iPod, Sony PSP, cellular phone and PDA. Build photo slideshow video ready for upload to your YouTube, MySpace. Create SWF Flash slideshow, perfect for e-mailing or posting online to your website. DVD Photo Slideshow does it all!

---

## **All-in-One Photo DVD Maker**

You can make DVD for playback both on TV and computer with simple steps all in one software. There's no need for other CD or DVD burning software. DVD Photo Slideshow can do all from the beginning to the end to make a DVD slideshow. And, the whole steps are simple, fast and robust: the Burn-Proof (TM) technique which makes the CD burning procedure more robust than ever!

## **Dynamic Slideshows**

Burn your slideshow with DVD motion menus and transition effects to DVD and watch it on TV using your DVD player. The slideshow editor includes all the tools you need to create eye-catching photo presentations. DVD Photo Slideshow enables you to add your favorite background music for your photo slide show. You may also select from pre-built menu templates or customize existing ones with your own picture and background music. Bring life to your show by adding transition effects between pictures. We provide some of the most visually elegant effects available in the market. You can even customize many of these effects, giving you a virtually infinite selection.

## **Photo or Picture Look Great On TV**

DVD Photo Slideshow optimizes your digital photo and use the High Resolution Still Picture format which is supported by most DVD , SVCD and VCD players. This technique makes photo look great on TV.

## **Professional DVD Menu Templates**

DVD Photo Slideshow features a library of professionally designed menu backgrounds and frames. Ranging from playful to professional, you're sure to find a background for any occasion.

## **Annotate your photos with your own text**

The built-in What You See is What You Get photo editor makes it easy to add your own comments for your favorite photos. The position, font, color and shadow of the text are immediately shown with the photo.

## **Backup Original Photos**

DVD Photo Slideshow allows you to save your original photo files into the video CD. You may play the burned video CD on TV with DVD player. In the mean time, you may read and show the original high quality photos on your PC.

## **What You Watch Is What You Get**

You can preview your slide shows before burning them onto CD-R or CD-RW disc. DVD Photo Slideshow simulates your TV and the DVD or VCD player with remote control. And, the internal mini-player enables you to enjoy your desired songs before putting them into your photo slide show.

## **Support creating image file before burning DVD or CD**

This feature provides more flexibility for users to choose the way of burning CD. User may use third party CD burning software such as Nero - Burning Rom to burn the image file created by DVD Photo Slideshow. This feature also helps when user wants to burn more than one photo Video CD in the same time.

## **System requirements**

- Windows 98/NT/2000/XP/2003/Vista;
- Intel Pentium III Processor and above;
- 256 MB RAM or more;

- 
- 10GB free hard disk space or more;
