Download it right now and have a try for free!

Key Features

Optimized formats

- Convert DVD, AVI, WMV, MPEG, MP4, FLV, RM, MOV, 3GP, ASF, RMVB, etc.
- Rip/convert DVD and video to iPod MPEG-4, iPod MPEG-4 AVC.

Previewing the files before conversion

With the help of the mate, conversion can be more accurate. You can preview the input files before conversion to get a general idea of the converted effect, check the correctness of the files, etc.

Support batch conversion

Multiple files can be converted in batches at a time, which will definitely accelerate the traditional conversion speed. Files more than 1000M can also be completely converted within a few minutes.

Splitting supported by TOP DVD to iPod Converter for Mac

The whole file can be split automatically in chapters, and you can choose your favorite chapter to convert. From now on, you do not need to convert the whole files.

Customize output effect

The mate supports you customizing the output effect, so that the output effect can be more suitable for your iPod.

Clear-cut and simple interface

On the simple and fresh interface, only correct and necessary instructions are presented to

lead you to your destination directly. You can get what you want in only a few steps.

No safety hazard
There is no virus, spyware or adware existing in the mate to threaten your computer, and you can use your computer without any worry.

Lifetime technical support and upgrade
You can get lifetime technical support and upgrade after you buy the mate, and if you have any question, do not hesitate to contact us. We will reply you as soon as possible.

system   requirements
